hey  
i have this database which contains a weird type of hashing the database has the following columns  
pass  
key  
passkey  
first user will be like thhis:  
pass: V1ABEVF1UzVTZIFiC28GZFM6CGc=  
key: xb5qfzvf5mcc5v7ayiscyb33ph37q7kb  
passkey: zcgitlhoppdieufhryuqsddvcfgtrqde  
anyone can identify this please?  
passkey is the same for all the users  
thank you

This doesnt look like any hash I have ever seen. Its most likely encrypted in another way or a custom algorithm.

I'll need a lot more information to be able to attack these. Can you send me some more lines as example data?

@ LSDoom i searched "passkey" on google and found this script  
<http://pastebin.com/Y1Sc4Htw>

@chickman sure here are more data plus can you please check the script above cause it uses same "passkey" maybe shares the same code or algorithm?

here are the more of it
