Thread: [ExterByte Crypter \[Detailed Review\]](#)

PVPMinersDE - January 23, 2017, 2:41 pm

>>>>ExterByte Crypter Review <<<<

This thread is a detailed review for the ExterByte Crypter and how the crypter is performing.

I tested a NanoCore RAT Server for Scantime on Pscan and for Runtimescan on my own VM's. I disabled any distributing features at all AntiVirus-Softwares

The Crypter overall has a nice GUI and works without any problems.

Just press f5 to rewatch the Gifs :)

Content:My Settings

Runtime Scan

Scantime Scan

My Rating

My Settings:Assembly Information (by Intel :))

Custom Icon

Mutex

Inject custom process on automatic and I used the compatible mode and the persistance

On Installation: Hidden Startup and Startup Persistance

Spoiler [\(Click to View\)](#)i.imgur.com/DttF6VJ.gif

Runtimescan:

Kaspersky:(long gif ~7min)

Spoiler [\(Click to View\)](#)gifyu.com/images/gifkaspersky7.gifKaspersky did recognize that the computer got infected and restarted it

After that it runned a couple of scans and deleted some files but the connection was still established and stable

Avira:(long gif)

Spoiler [\(Click to View\)](#)i.imgur.com/8izl1sv.gifEverything went fine with Avira. No detections. Even with additional scans nothing got detected

eset nod32:(long gif)

Spoiler [\(Click to View\)](#)i.imgur.com/pWMB08v.gifEset nod32 did not detect the Virus while exectuing But it detected the Virus after but was not able to kill it :)

Scantime:

Spoiler [\(Click to View\)](#)pscan.xyz/image.php?id=kzrflcPbLkppWOKR could not be better :)

Rating:

In my opinion the ExterByte Crypter is worth every \$(1 month license only costs about 12\$ what's fairly cheap). And does it's job quite good :). But a few more features would be very helpful for example a melt file option or even a hide file option.

Due to these factors the ExterByte Crypter gets a:
9/10

Hint:

There're rumors about ExterByte Crypter, that it's just a copy of the orway crypter and that the same developer who is known for some scams is behind this project but i cannot confirm this.

Thank you for reading through my whole Thread. I'd appreciate if you'd let me know if you liked this Thread and if I should do more of this even if its very time consuming :) Maybe some Crypter-Owner is so nice to give me a vouch copy so I can write a review about the crypter.

Btw. I'm sorry for all the mistakes i made in this Thread. English is not my mother tongue. I also tried to hide my name but I miserably failed. Whatever :)

Will update the Thread once i reached 50 posts :D

ChnK - January 23, 2017, 3:15 pm

Thanks for the review, hope this encourages more people to test it out. I'll personally test next month.

perk. - January 23, 2017, 3:16 pm

Nice review, and a nice HQ post, thanks for this dude!

KING - January 23, 2017, 3:46 pm

Hello,

Well Thank you for taking time to write this detailed review. The Orway allegations were not true. It was planned scheme by old HF member "Wardow" who was member long time ago and got banned permanently but these days he operates under new account which is "Twistd" and his mission was to destroy my project. In which he failed. I dont care about haters. Providing quality crypter is my always aim. Right now we're bypassing 100% scantime and runtime. I'm sure some haters will make posts on this thread like (Oh probably this guy is paid by KING for making this review and so on). My message to haters is that when you provide quality service. Customers speaks themselves. You don't have to pay them.

ExterByte Crypter has three main goals:

- 1- Affordable prices
- 2- Quality crypter
- 3- And not forget our customers after they purchase.

Soon we're gonna introduce lots of new features and changes. :)

Best regards
-KING

You really think I am Wardow? Wow you're more stupid than I thought in the first place. I hate on your project because you spam threads like a mother fucker. Here is another classic example provided by you and written by you.

If I wanted to destroy your project I would've ruined it.

However why would I even waste my time on your poorly coded ripoff which you didn't even code yourself?

Dude seriously I got way better things to do so don't flatter yourself by thinking I give two shits about your crap.

Hey Twistd this review took me about 8hours of work, therefore I think it's very disrespectful to pull down my hard work wich i put into this project. Also i want to point out that im not paid by King to make this review. I just want to give the community something back and I enjoyed using this product

(Jan 23, 2017 09:09 PM)©Ratatouille™ Wrote: [\[CITE\]](#) Not planned is TRUE

@Ratatouille I think it's kinda ironic that you always try to bash King.

I'd be better if you'd keep focusing on your own crypter to make your crypter more competitive so it can keep up against competition that you don't always have to bash other crypter owner.

I don't say you're wrong but sometimes it is wiser to hold back

That 3rd goal, I have been waiting for you to accept my Skype request for a while now. Also tried to email you but that didn't work either.

Even if you are not paid, King told you, and not someone who knows how to do it properly to do this for a reason.

Zexus99 - March 18, 2017, 5:45 am

How many king send you to make this fake review of ""his"" crypter ?

PVPMinersDE - March 19, 2017, 2:43 am

@Zexus99 I made this review because i liked the exterbyte crypter and King neither asked me for this nor payed me to do a review. If you'd look into my other posts you could see that i've done a couple of other reviews for other crypters.

pain08 - March 19, 2017, 5:16 am

I like this crypter

i hope support of exterbyte Crypter will add me soon ;)

Malicious Intent - March 19, 2017, 5:25 am

Lol you spent 8 hours for this? dude get a life.

Facts:

Its been proven that it was an Orway copy. Not sure what it is now but by saying it was fake allegation kings is lying as he had to close sales to get to the bottom of it. There has been a solid proof for that by Rata and other members on this forum.

Codefuser - March 19, 2017, 6:19 am

Just found some more proof that it is indeed a copy of Orway.

perfido - June 20, 2017, 2:38 pm

Hello links to buy the crypter exterbyte ??

PVPMinersDE - July 1, 2017, 2:10 pm

<https://hackforums.net/showthread.php?tid=5500310> Here you go.. But i wouldn't recommend buying it you can have the same results by just using WinRar and you don't need to waste your money

WinRAR won't give you the same results

MindFreak™ - July 1, 2017, 4:11 pm

(Jul 1, 2017 02:10 PM)PVPMinersDE Wrote: [\[CITE\]](#) you can have the same results by just using WinRar and you don't need to waste your money That's ridiculous, Winrar doesn't encrypt the startup file, so what is the benefit then.

PVPMinersDE - July 2, 2017, 3:24 am

(Jul 1, 2017 02:20 PM)Malicious Intent Wrote: [\[CITE\]](#) Don't say it in public or KinG will SFX you too. Just wanted to trigger some people I don't care about my reputation on "PVPMinersDE" lol^^

(Jul 1, 2017 03:56 PM)Sheeple Wrote: [\[CITE\]](#) WinRAR won't give you the same results It actually would tho. I think "VBScripter" showed a method encrypting your file with WinRar and it was scantime (and runtime) UD (1/49)

But i don't want to trash any sales for King and as long as people are satisfied with his product i'm totaly ok with it ^^
