Thread: [Find phone number from facebook ?](#)

Sleepintheorst - January 24, 2017, 10:33 am

Hello ! It is really long messy story short: My friend found fake fb account(idk how) so we started chatting with him. I had also fake account so he did not know who I am. As i was saying we were chatting with him. Then he got into relationship with some girl. I got into his crew (mostly girls between 10-15) I have started a conversations with his gf and two of his friends. They showed me some photos of the real him but he was looking too beautiful(you know if you are too beautiful why would you spend your time in fake account ?) So he told me that i am psychopath and i got really mad. I checked some of his information in Forgot password (I think everyone knows this way ?) so i saw his email starts with O but his name was Stefan there is no way it could be Stefan. I forgot to say that he had fake accounts of his fake accounts. I saw in instagram o*****. And that is how i got his first part of email but wait there were still 3 letters and it end on g.. I know this way with yahoo but he is not on yahoo so it won't work. Then i saw his number that ends on 72 i knew on which operator he was so there were still 5 numbers. Also i want to contact with him because i want to see who really is he. He made one girl to send him nudes so i got mad about it. I forgot to say the way I understood that the boy from the pics that girls show me isn't he: I collected most of his photos that girls showed me and one photo was in Casino Monte Carlo. One girl asked him if he has ever been to Monte Carlo. He said NO. That's how i got him. Thanks for spending your time onto thie subject. I hope you could help me find his number ?
