Thread: [Shutdown other computers on your network no experience needed!](#)

Vip3rr - July 19, 2010, 2:09 pm

it is just like a sick little thing

1.start>run type in cmd

2.type shutdown -i

3.click browse and shut it down

Note that it does not work in all networks

It worked for me

Dont ask for +Rep thats why you were warned.

fmjc001 - July 19, 2010, 2:54 pm

On a secure network the security policy will require administrative privileges before it accepts a remote shutdown command.

FallenOneGee - July 19, 2010, 5:12 pm

I get this error.

The active directory domain services is currently unavailable.

Prank Calling - July 19, 2010, 6:04 pm

This has already been posted, but it's the thought that counts.

terminator84 - July 19, 2010, 6:14 pm

well that way dont work
and very old idea

hacker13374 - July 19, 2010, 7:49 pm

hmm okey i will test it !
