Thread: [Netseal error - AutoLOG Keylogger](#)

Jockiboierik - January 24, 2017, 12:17 pm

Hey, I just bought a keylogger called AutoLOG Keylogger. I got my license but once I redeemed my license and trying to Continue the authentication system is giving me this error:

[Authenticator: 2.2.1.2, Loader: 2.1.1.1]

Update metadata is corrupt.

System.Exception
at Authenticator.GTB()

Do any of you know why? I have disabled my firewall and Windows Defender and tried run the program as administrator.

Regards,

caiveman - January 24, 2017, 4:41 pm

AutoLog is broken :) It's an old project.

Regards,

You are about 1 month too late to the party my friend

How did you make it work ?

I bought the premium version, i'm interested.

BlackHats2015 - February 6, 2017, 6:26 am

just tried it again and its working fine. net seal worked fine etc

Codefuser - February 6, 2017, 7:01 am

AFAIK AutoLog will come back eventually now that proxy selling is allowed.
