Don't know if this is in the right section or not, but this game is mostly anime themed so yeah. Just curious if anyone else plays osu! besides me. I'm currently rank 7k and decent I guess, mainly play HD or HDHR.

Nice background. You're pretty good! Much better than I was when I played.

Not drawing a dick on her ass with smoke. You a boosted animal or what?

Much better than I. I stopped playing a while but tried starting again last month and I can't even play without my arms starting to burn. Not enough stamina and cant find good songs to build it back.

It just takes practice, eventually your arms won't even burn that much.
