Thread: [\[Official Group\] My section in Royalty //](#)

exploit.c - January 25, 2017, 7:41 am

Hey all,

It has come a time I must sell my section in Royalty, because I have to take a few months break and won't be able to maintain it properly. I own a password-protected section in Royalty, moderated by myself. We have a group of intelligent programmers working on projects that will make good income (for details, please send me a private message. I won't be disclosing them here).

I'm open to offers, but please don't lowball me. For making offers in private, shoot me a Private Message.

Bin: \$400

Thanks,

I wonder how much these actually go for. Good luck.

If this is the programming sector, it's sad to see it go, it was fun while it lasted! GLWS exploit.

What's your preferable price, rather you set one than me.

GLWS Exploit. Remember anyone who is buying this must pay an extra \$25 to Omniscient for moderator. I may be interested in buying if a few of my friends on here message me looking to team up.

What's at least the minimum you would take so I can build from there?
