A few majors ago my buddy got two cobbles from one game. I told him to sell them but he just opened and got shit skins.

Kinda was curious about drops and yeah I had Drops in the title but thought it was stupid haha

My drop was like a 1-400 odd if the viewer count all had steam connected and owned csgo. I would assume your odds are anywhere from 1-50 to 1-1000 depending on how rounds are played.

Gummy Bear - January 26, 2017, 4:52 am

I always get one every major, sadly I got a train one and last year was a train and before that was cobblestone I guess my luck for good cases is up. But, I got a case either way so better than nothing.

I am pretty sure I have gotten one every Major that I watch a majority of. I was at the last USA based Major but ended up getting one while watching group stages at home.

I have made bet for navi to win, lets hope together!

Fnatic vs gambit will be interesting to watch as well, gambit seems to have stepped up tremendously.

I put \$280 on Na'Vi as the winners before the major started, getting a satisfying pot of gold if they bring it home.

Gambit is gonna win for sure imo. Fnatic are lucky to even be out of groups.

Fnatic was always trash, even with their 3 players. they are a 'burst' team who play off momentum. Kick the momentum take 1-2 rounds and they are MIA the rest of the match.

Not always, when they had the 5man lineup they were gods :)

But yeah since the split for godsent and back it been going down for them.

Wonder if the rumours about them going back again to full old Fnatic lineup is true, pronax said no but I'm still unsure about it. JW cried when they were losing, never seen that before... maybe has something with him just regretting that they didn't came up to the same level as they thought they would when they splitted.

It really is a piss off that you have to choose the winner from the start, if your 4 picks fail it's like well fuck gg no chance of gold or even bronze. Navi and Gambit both my picks failed. like wtf.

Yup I was pissed when Navi lost. I have the bronze trophy and can only get the silver if SK win and then if VP beat SK. I hope I get it. I also lost most of my bankroll on today's games

I still have hope for silver. I thought it was over when I checked the score and it was like 3-12 in favor of North and then the curse struck them lmao.

Silver Fang - January 28, 2017, 1:06 am

I wonder why they made so that you have to choose from the get go who will advance and win... Who don't they have each ?

I mean i put navi to get to finals but they didn't even advance once... :S

I know it is weird even with the Swiss System. I am in the top 30% and I only have 30 points. I don't think many people will get gold.

Think our luck is going to run out, doubt VP will beat SK with how they've been playing recently.

NegativeRep - January 28, 2017, 10:58 am

I got my bronze, VP Pick & SK Pick. I look at my Pick'em board and I can get 10 more points if VP Win, putting me at 49 Points. No way to get silver. Due to the top row being Na'Vi all the way. Unless they are still giving out 1 point every day for participation like the other majors. Then if VP Wins I'll be at 49+1 for straight 50 just barely getting silver.

sitting at 40% with some very logical picks. This is sad :(

Yeah SK is on fire at the moment. It seems like it takes them about half a match to a match to warm up then they become unstoppable. I really hope VP can pull it out though. I need that silver.
