Thread: [\[Upgraded Members Only\] Leakedsource Alternative](#)

MUST be upgraded to either L33T, UB3R or 3P1C!

Since Leakedsource got taken down, I found a site that is similar to Leakedsource. It's way cheaper, has private databases. Some of you guys might know of it.

If you want a link to the site, let me know and I will promptly send it to you.

Unencrypted hashes and very messy output (110 gb db's) complete trash imo

<https://leakbase.pw/>

Haven't tried but has the main db's (110 gb db's)

If I could get a free search i'd appreciate it. I don't have BTC to buy rn and I bought a 7 day at Leaked for nothing :(
