Fake ad? Excuse me but if you wasn't so impatient you wouldbsee that uTorrent is in your Start Menu. It might not be on your Desktop but please check twice your facts.

We do not remove services unless you violated the ToS.

The reason you haven't received your RDP yet is because we process orders manually and activate them manually. We also did send you a mail that said it could take up to 24 hours.

If you have paid the invoice, your RDP will be activated soon.

Only real question I would have for you and your service is what type of monitoring do you do on the machines? You have explained we are not allowed to install any software which would lead me to believe you are selling machines that you have complete access to and can monitor anything you would like. Would this be true? If that isn't what you do then explain exactly how you have the access to see the installed software of a machine. Generally I would find that to be very odd and a privacy violation.

Hi,

Can I host utorrent?

I seek to download and seed some torrents.

I also will have a website client running at all times. It's not heavy usage but it's the main need for an rdp for me.

I really can only spend \$5. I was previously hosting with crystal-cloud but he doesn't seem to be working anymore.

Please let me know if I can host those things and if there is anything you can do for me to get 75 or 100GB for the \$5 price?

That's what I had before at that price so I'm looking for something to replace to match it

You are welcome to do torrenting. Instead of uTorrent we provide our users with Deluge. Ad-free and way more stable.

\$5 will give you 50GB HDD, we can't give you 75GB or more, that is unfair and not in lines with our business model.

If you think 50GB is not enough go with our Medium RDP Plan, then you will get 100GB and use discount code WELCOME2017 for 10% off so you will pay \$9 instead of \$10.

We do not give users administrator rights.

If there are any special programs you want to have installed, you can request that in Live chat or a support ticket.

(Feb 8, 2017 11:03 PM)Y2J. Wrote: [\[CITE\]](#) Can we use those server for streaming with obs ? is there any cpu limit ?

CPU limit is ~20% per user.

Alert: we have restocked NL AMS-1! That means that there are new slots available.

Be quick before they sell out again.

<https://gyazo.com/6eeba20c3a68aa0dca79f52025d9df3b>

Still not connecting so unable to use FTP.
Something was changed yesterday to cause this.
Do you need to try to uninstall/remove and then reinstall FZ server?
I don't know what's wrong, I'm obviously not admin, but this is a considerable issue at this time!

ColtyTheGod - February 10, 2017, 3:17 pm

Looks like someone is hogging CPU usage as CPU usage always at 100%.....

FatStacks - February 10, 2017, 3:22 pm

Make sure when ever buying services like this you thoroughly read through the TOS. You can not use more than 20% ram or cpu or they could theoretically suspend you or terminate you.

Looks like someone breaking their T.O.S then probably because there is no staff online.. are you getting the same high cpu usage?

redmoon90211 - February 10, 2017, 4:42 pm

can you check this server 94.23.147.234:9966 ?
no internet connection

BlueRDP - February 10, 2017, 4:45 pm

Please guys, we are closed right now so we do not activate services so stop spamming me.

About the connection, we will fix that soon.

People who get over 20% cpu will get terminated indeed.

DontWorryBeHappy - February 10, 2017, 9:30 pm

Do you think you will be able to fix the Filezilla issue?

I'm unable to take the backup of my files without the ftp server working

Bought a RDP from him.. the server is totally overloaded.. 100% CPU all the time.

No vouch from me..

Kat? Upton - February 11, 2017, 11:13 am

So far so good with the RDP, having the 100% cpu usage too but its not too big of a deal.

RDP's are shared, we do not oversell. These RDP's are used for cracking so 100% CPU does not matter.

You have done a chargeback on PayPal, that shows what kind of skid you are.

Have a nice day :).

Thanks for the honest feedback, 100% CPU is no problem if you are botting/cracking or whatever. I like that you are honest. ?

(Feb 12, 2017 10:44 AM)ColtyTheGod Wrote: [\[CITE\]](#) Server has gone down? AMS-2?

I completely gave up using my RDP, it kept shutting down and i had to reopen it and wait for it.

ColtyTheGod - February 12, 2017, 10:00 am

Shut down? that meaning they have shut down the whole company?

SIM-2193483 - February 12, 2017, 10:18 am

My RDP is down too :(I have such a bad luck on buying rdps, ALL of them got shutdown even within a month.

And their site: <https://bluerdp.com/> is just funny lol

Correct a Exit scam as i like to call it.

Konstantinos - February 12, 2017, 1:32 pm

User got banned on another forum called Nulled for scamming, I guess we all got scammed

DontWorryBeHappy - February 12, 2017, 1:38 pm

im very confused if this is going to be resolved at this point and im waiting for him to reply and fix this stuff

Lovely? - February 12, 2017, 1:42 pm

HHAHA THAT GIF THO, LMFAOO

00god - February 12, 2017, 1:53 pm

You do also realise that all your servers were all in the same place, Netherlands, just he GRE tunnelled other servers and said he had other locations.

Pasco - February 12, 2017, 2:16 pm

RIP got scammed atleast it was only 4 usd
