Thread: [OVER \\$600 MADE >> jEMPIRE PHANTOMAD | VIRTUAL MONEY MINT | MAKE ~\\$20/DAY AUTOPILOT](#)

FriendlyHugs - January 26, 2017, 3:53 pm

Just what is PhantomAd?

It is a Java program that silently visits ADF.ly and # links and clicks the "skip ad" buttons, acting like a human.

How much can I earn?

The amounts in the thread, ~\$242 and ~\$388, are from # and ADF.ly respectively. I used around a thousand bots and had at least 400-500 online at any time. Keep in mind these rigs were not high quality, many had only one or two cores and under four gigs of RAM. Most did not have graphics cards.

I let it run for exactly 31 days, so you can do the math yourself. It works out to just over \$20/day.

I only accept Bitcoin payments. Please click anywhere on the thread design to visit [our website](#).

This is the type of stuff that makes me want to get into a botnet.. Like I am not really harming anyone just pure profit. This is great idea and would buy if i had net.

Southside - January 26, 2017, 7:54 pm

*OP, let me know if my post bothers you and will delete it.

If someone knows how to run a botnet(as i don't) i can invest money in this product and in bots too.
Just let me know

Your post is fine. But why would anyone contact you? If they can run a net and afford the investment and you don't know how to run a net nor do can you afford the investment, why would they contact you? What do you bring to the table?
