Thread: [Instagram usernames scraper?](#)

mzaboss - January 26, 2017, 4:17 pm

Hi, I just wonder any one got Instagram usernames scraper?

I want to scrape from example who ever follow Profile @Instagram

If you got one please let me know. thank you.

+Haze - January 26, 2017, 5:33 pm

Hmm, I'll make a little gist file and upload it later today :)

Ninja - January 26, 2017, 8:28 pm

The only major problem with this are the rate limits. You can bypass them by using one of the API's available that have less strict limits but you can't fully bypass them except for using proxies.

TRAUMA - January 26, 2017, 8:28 pm

I can do this for you, hit me up.

I can provide proxies, and I believe the limitations is per the TOKEN. So what if we use multi tokens?

Example:

Scrape -> GOT LIMITED -> Use Second TOKEN -> CONTINUE SCRAPING.

You are lucky if someone would make you the whole program for free. You are already lucky that Haze is going to write you a class to do it. We do not owe you anything so don't talk like we do. You are not even paying.

I worked with this guy many times in the past. He is a scam artist and likes to low ball when it comes to money. Keep away from him
