Thread: [Exploit tags being reset?](#)

trauma - January 26, 2017, 7:04 pm

I have seen tags from the exploit being changed to a random tag. I don't know if Microsoft is taking action or what, but be sure to check your tags. Also check the recent activity on your home and see if other tags on your friend list got reset.

I hope this is not the case, I just bought a tag from the exploit. How many tags have you seen been reset?

Yes they are, saw my buddies tag get reset

Prophett - January 27, 2017, 1:59 pm

I'm glad I never went through with purchasing one.

How can you tell if a tag was part of the exploit, was thinking about purchasing one. How can I check?

I think the spaced out tags are getting reset slowly. If it's not spaced out and obtained through the exploit you should be fine. The ones that have been reset is because the owner was publically selling them. At least I hope this is the case.

Only certain tags got reset. The rest are not ever going to be. It had to be for a specific reason.
