Thread: [htaccess rewrite?](#)

Skidy - January 27, 2017, 4:45 am

Dont know where to put this other than here. If its in the wrong section please just tell me.

So I am trying to rewrite www.mysite.com/view.php?code=ANY_LETTER_OR_NUMBER
to www.mysite.com/view/ANY_LETTER_OR_NUMBER

This rewrtes my .php to just /view/

PHP Code

```
<?php
RewriteCond %{SCRIPT_FILENAME} !-d
RewriteCond %{SCRIPT_FILENAME} !-f
RewriteRule ^(.*)$ $1.php
```

How can I do this?

This is what I have currently:

```
RewriteRule ^view/(.+$) /view.php?code=$1 [L,QSA]
```

Doesnt work

Specs - January 27, 2017, 3:22 pm

<http://stackoverflow.com/questions/12138697/htaccess-rewrite-php-to-virtual-folder>

This should help you somewhat, i never made it look like a directory before. For a shortener i worked on i used this:

```
RewriteRule ^(\w+)$ filename.php?id=$1
```

It just left with the id/num but without the directory.

(Jan 27, 2017 10:45 PM)Yani Wrote: [\[CITE\]](#) Is this your whole file? Maybe you have something above that rule that fires first?

Yeah its my whole file. Want it to take a directory under view.

(Jan 28, 2017 04:14 AM)Yani Wrote: [\[CITE\]](#) You have to add this above the ruleset:

Code RewriteEngine On

I have that on already. Still doesn't work.

Any ideas??

(Jan 28, 2017 04:45 AM)Yani Wrote: [\[CITE\]](#) Maybe look at your apache access log?

Should this work then?

```
Code RewriteRule ^view/(.+)$ /view.php?code=$1 [L,QSA]
```

NoSuchAgency - January 29, 2017, 3:49 pm

Try this

```
Code RewriteEngine On
RewriteRule ^view/([^\.]*)\.php$ /view.php?code=$1 [L]
```

```
RewriteEngine On
RewriteCond %{REQUEST_FILENAME} !-f
RewriteRule ^([^\.]*)$ $1.php [NC,L]
```

RewriteRule ^view/([^\.]*)\.php$ /view.php?code=$1 [L]
```

```
RewriteEngine On
RewriteCond %{REQUEST_FILENAME} !-f
RewriteRule ^([^\.]*)$ $1.php [NC,L]
```

It works but all of my code is gone weird.

<https://hisky.space/view/car>

Look at that URL. It makes the page lose some of its HTML.

It seems to break here:

NoSuchAgency - January 29, 2017, 5:03 pm

Hmm weird. It shouldn't be doing that. I am at work but I'll be home again in 4 hours to give a better look. If you send me the source code (or rather access to the server) I'll see what's up

Brilliant, thank you. Ill send it now

NoSuchAgency - January 29, 2017, 5:05 pm

Try turning the [L] to [L,QSA]
