Thread: [\[MyBB\] Forum Icons Help](#)

Yaleu - January 27, 2017, 5:35 am

I've recently changed the forum icons on my forum under the template, forum_depth2_forum. The edited version of the theme I am using was using FontAwesome icons, that don't really have a lot of customisations or versions. I decided to use custom images that I would upload onto my server, under F_Icons.

They worked partly, but only for forums that had no new posts in them, like so
(how it's suppose to look)

[i\(dot\)imgur.com/am0zWfg\(dot\)png](#)

(how it actually looks)

[i\(dot\)imgur.com/OF1iwr7\(dot\)png](#)

Everytime there is a new post in the forum, it breaks the forum icons and displays "forum contains new posts". The only way to solve it, is to click the text (reading the posts) and it fixes it.

Is there any way to remove the "forum contains new posts" and simply just have the icons under F_Icons there 100% of the time, even when there are new posts and no new posts in that thread?

Here is the default forum_depth2_forum code:

Code <tr>

```
<td class="{ $bgcolor}" align="center" width="1"><span class="forum_status
forum_{$lightbulb['folder']} ajax_mark_read" title="{ $lightbulb['altonoff']}"
id="mark_read_{$forum['fid']}"><i class="fa fa-commenting"></i></span></td>
<td class="{ $bgcolor}">
<strong><a href="{ $forum_url}">{$forum['name']}</a></strong>{$forum_viewers_text}<div
class="smalltext">{$forum['description']}{ $modlist}{ $subforums}</div>
</td>
<td class="{ $bgcolor}" align="left" style="width: 80px;"><span class="smalltext">
  Theads: { $threads}{ $unapproved['unapproved_threads']}<br />Posts:
  { $posts}{ $unapproved['unapproved_posts']}</span></td>
<td class="{ $bgcolor}" align="center" style="white-space: nowrap"></td>
<td class="{ $bgcolor}" align="left" style="width: 220px;">{$lastpost}</td>
</tr>
```

Here is my edited forum_depth2_forum code:

Code <tr>

```
<td class="{ $bgcolor}" align="center" width="1"></td>
<td class="{ $bgcolor}">
<strong><a href="{ $forum_url}">{$forum['name']}</a></strong>{$forum_viewers_text}<div
class="smalltext">{$forum['description']}{ $modlist}{ $subforums}</div>
</td>
<td class="{ $bgcolor}" align="left" style="width: 80px;"><span class="smalltext">
  Theads: { $threads}{ $unapproved['unapproved_threads']}<br />Posts:
  { $posts}{ $unapproved['unapproved_posts']}</span></td>
```

```
<td class="{ $bgcolor}" align="center" style="white-space: nowrap"></td>
<td class="{ $bgcolor}" align="left" style="width: 220px;">{$lastpost}</td>
</tr>
```

Any help is much appreciated, thank you.
