Nice. Gunpla is fun stuff. I have one I put together sitting on my desk at work. It's a nice relaxing thing you can just set down and come back to later.

Nice. Ye they can get expensive. I remember this one from a few years ago that some guys in Korea were selling for ~\$98,000 USD:

I'm wondering why you would need tape and pliers to build this, was it difficult?

I didn't need tape it was just there just in case

and those aren't pliers they're side cutters to take out the parts from the runners
