Thread: [Open Source Email Bomber & Spoofer \(Also Includes Exe\)](#)

sp?c?m?n - January 28, 2017, 2:30 am

Quickly releasing a open source email bomber and spoofer which also works with gmail
Notes

When bombing a gmail email dont put a subject so they wont stack

You need to allow third party applications to access your gmail can be found here

<https://www.google.com/settings/security/lesssecureapps>

Download It Here

<https://www.sendspace.com/file/ks0kug>

Enjoy The Release

If you make some changes to this like Making it look better adding in spoofer and adding in more threads you can also sell this to make you some \$\$
