How many hours a day are you online: 1-3 hours a day (sometimes more)

If accepted into the group, will you be active in the sub forum: Yes I will be active in the subforum and help others.

Juicy - February 6, 2017, 3:52 pm

Name:Juicy- (Jake)

Age: 19

Skills: Social skills, marketing major at college, social engineering (Not illegal social engineering, the actual real life practice.), support both emotional and professional, and many other skills that are hard to define. I am not technically talented in coding or anything of that sort, but however I am talented in social media and other things.

Monetizing methods:I started making money online seven years ago. This began with an xbox live method. Since then, I have evolved into many money methods. eBay, CPA/PPD, SE (abandoned 3 years ago), amazon, reselling, advertising, writing service, and reviews.

What is your typical income for a day:As I am a full-time student in college, on a weekday it will range from \$0-\$85. On the weekends when I am not busy or we do not have parties and such, I will make anywhere from \$50-\$150 per day. (\$150 is a pretty good day.) The greatest amount I have ever made in a day fully online was \$650, which was two years ago in the summer. I had massive amounts of time to spend online and could really put forth my best effort into what I was doing at the time. During the summer and winter breaks I am able to make much more money during the days, but it is not consistent money. I have never been great with consistent methods so I have always been the type to do multiple projects at once in a way to have income no matter what, even when a project isn't going well.

Why do you want to join the group?:I was in the original Marketers. I love the userbar, and also love the vibe that I have been seeing from the group around the forum. I have seen The Grim around the forum for years now, and I have always had a great deal of respect for him. He was one of the first people that I ever did an exchange with on the forum, and thought that he was very cool. I was personally not in The Nightmare group, so I cannot say how his previous groups were run but I always only heard great things. I believe that this group would be an awesome way to advance my knowledge while also providing some for others. I think that nothing but great things could come from joining the group.

Why do you deserve to be apart of the group?:As I stated earlier, I am a marketing major in college. Since the age of 14, I have devoted many hours into this site and I have gained a lot of knowledge that I could not have learned elsewhere. Since my first months here, I have been involved in the marketplace and I have never once had a scam report. I love the community and I feel as if most of the community has also had a sort of respect towards me as well. My peak on HF was during 2013/2014. I was online all the time and was known very well then. I am in the HF wiki under "Juicy Booty". In 2015 my activity fell off, and has now since October been fully resumed. I plan on being very active for a very long time from here on out. If you want a user who has done literally hundreds of deals, respects others, respects the community and the site rules, and will never be a risk to the group, I believe you have found him.

What do you think about The Marketers:From what I have seen in the short amount of time that the usergroup has been on the site, it seems to be an awesome group. I believe many people will be able to see the usergroup and know that they are dealing with trusted members. All of the users that I have seen in the group seem to be awesome members. I believe it has the opportunity to be the best usergroup on the site, especially given the current status of groups.

How many hours a day are you online:For the past three months I have been online for around 4-5 hours a day. I would expect that kind of activity to continue.

If accepted into the group, will you be active in the sub forum:Yes, I will be extremely active in the

subforum.

Thank you for allowing me the chance to apply given my 20% warning level. Thank you for reading and have a great day.

?

Name:

Error

Age:

23

Skills:

- Impressive computer skills.
- An out of the box way of thinking.
- Years of experience with real life marketing.
- Ability to search for unregistered domains to resell.
- A very quick learner with the ability to teach myself.
- Able to find ways to make profit with zero-investment.
- Able to give an unbiased appraisal/review of a product.

Monetizing methods:

- Occasional selling on eBay
- Selling and trading OG domains
- Offsite item trading in online games
- Selling personal private methods (exploits, bypasses)

What is your typical income for a day:

About \$200/day from my job (5 days a week)

About \$30/day from online earnings

(haven't put much effort into my online earnings lately)

(my real life job provides me with all the money I need ATM - this will change)

Why do you want to join the group?:

I would like to be an asset to the Marketers group to both expand my knowledge and skills while also assisting other members in getting started on their marketing adventure. I used to be co-owner to a site called MonetizingForum that me and a friend started back in 2012 and it was an amazing experience to both learn from and teach members. I've spent the past 10 years living comfortably

working really cool jobs which have given me a lot of real life marketing experience. I used to manage the marketing for a recreational cannabis dispensary in my city, when we opened in 2012 I developed their website and managed all of their social media pages. Within a year and a half we made over a million dollars in sales - this is unseen in start-ups, it was a major milestone in my life and it taught me a lot about how much work goes into developing, marketing, and selling a product.

Why do you deserve to be apart of the group?:

I don't think anyone deserves to be a part of any group, I feel like they need to earn their way in by proving their potential. If given the chance I will put in the time and effort in to prove my worth. I've been here for years and have seen groups come and go, in the entire time I've been on HackForums I've only ever been in one other group and that was an intentional choice - none have peaked my interest until today, none have had the potential I see in this group.

What do you think about The Marketers:

I think it's an absolutely wonderful idea for a group. It has a lot of potential to become one of the best groups on HackForums! This is something HackForums has needed for quite a while. We need to make the marketplace great again!

How many hours a day are you online:

6 - 12 hours a day depending on the day of the week.

I'm online every single day.

If accepted into the group, will you be active in the sub forum:

Absolutely! I have been an active member of HackForums for over 7 years now.

I visit the site every day and would definitely dedicate the majority of my time to the group if I was given the opportunity to participate in this awesome community.

? Thank you for reading and considering my application, I look forward to hearing from you! ?
