fire

```
webClient.Headers.Add(HttpRequestHeader.UserAgent, "myualol")
```

Thats vb xxxddd (assuming you have your own donwloader source)

or hack into some website, and upload your exe and generate direct download link.
or buy free domain + hosting (look for students discount you need .edu mail though)

Make sure you change icon of your exe to fake others that is original exe.
Enjoy Spreading !! Let me know if you need any other help.

buy hosting which allows malwares to be uploaded. and upload through cpanel. From cpanel only u will get option to copy the url to download. :)

Enjoy. If any issue feel free to pm me.

1_download your own .exe file from zippy share.

2_click ctrl + j.

3_you will find a link under the file.. copy it!

4_this link will be the direct link of your .exe.. so post it on your website.. the website can be a fake game or program :) easy.. just pm me
