Thread: [Problem: can't place a background img](#)

Coffee is love - January 29, 2017, 6:38 am

Hello so yeah i'm partially retarded and i'm trying to make my own Point of Sale program via python and I want to make it semi visually appealing before i get into any gritty backend stuff but i've never put any images or colors into anything lul so I want to make the background an image and buttons have a gradient; I'm using tkinter and no matter what i throw in my code it won't work or load!

Spoiler ([Click to View](#))Code from tkinter import *

```
def donothing():
    x = 0

root = Tk()
root.attributes('-fullscreen', True)
root.bind("<Escape>", lambda e: e.widget.quit())
root.title("POS")

def callback():
    print ("CASH IS FOR SEXY PEOPLE")
def credit():
    print ("credit")
root.geometry("700x400")
c = Button(root, text="CASH", command=callback)
b = Button(root, text="CREDIT", command=credit)
b.pack()
c.pack()
root.mainloop()
```
