Thread: [\[RESOLVED\] Every time I upload an image on HF it doesn't work?](#)

iBangSoccerMoms - January 29, 2017, 4:05 pm

I've tried almost every photo site and every time I attach the image on my post it'll show up like this:

<http://image.prntscr.com/image/d46702752bdd43fea36afed3715148e9.png>

How do I fix this?

ChaoticForce - January 29, 2017, 4:07 pm

because you need to use imgur and put it in as Code [img]https://imgur.com/test12312.png[/img]

minimalist - January 29, 2017, 4:08 pm

Prntscr doesn't support HTTPS and we force it on all resources. You'll need to upload your images to Imgur and embed it in your post using the Code [img][img]tags.

What this young man said ^ you can also use pi.gy I'm pretty sure.

SparkMasterTape - January 29, 2017, 4:08 pm

make sure it has the https tag as Omni restricted it to https onlh

I already explained better thank you very much. ?

Botted - January 29, 2017, 4:12 pm

My sig appears as a link even in tags sometimes. It's strange

You're name gives me next level cancer.

J?son - January 29, 2017, 4:17 pm

all images require the use of https
