HostBubble - March 28, 2017, 1:44 pm

@ BasedGLatino you're not allowed to abuse more than 80% of CPU by running multiple instance of the same program. Hope you understand well.

HostBubble - March 28, 2017, 1:59 pm

@ BasedGLatino we control using the CPU threads by assigning threads for the following program. But if you use multiple instance then it interrupts effects the overall server performance. This is high end server shared with other users as well.

As a matured user you could contact us to resolve your issue instead of posting in public.

We give more flexibility to our users.

looking forward to contact us.

I'm kinda dissapointed at my purchase, the server is working fine, but there is no one who can answer why the sold me a graphic card to my server and added extra cost onto my server.

At first they knew everything about what I needed, after giving the money, I keep getting support guys who don't have a clue of what to do?

I would like to speak with the person from your company that sold me the machine. Also when I try to purchase stuff, i wait over hours to get a reply from support.

Fortunately, you did not pay additional cost for an external GPU card. Your Processor had an inbuilt GPU which did not charge you extra. Here is the Intel link of the exact processor you have purchased -

https://ark.intel.com/products/80916/Intel-Xeon-Processor-E3-1246-v3-8M-Cache-3_50-GHz

Skype does not transfer chats on time very often and it is disappointing sometime. I advice you to

open Ticket each time for faster response.

You have purchased this server from us & we charged 54.25 EUR from you which is the regular price for this server

Server Model- Lenovo ThinkServer TS140 E3-1246v3
Intel Xeon E3-1246v3
RAM 16GB ECC DDR3
Drive: 500GB HDD
OS: Windows 7 64-bit
50 TB Traffic per month
100Mbit Premium Network
DDoS Shield protection 5 Gbit/s
By default we don't offer any managed services.

Payment per month- 54.25 EUR Here is the product link -
<https://hostbubble.net/cart.php?a=add&pid=55>

Regarding our response time, it should have mentioned within our terms already. Please check again.

Hi would these RDPs be allowed for RS botting?

HostBubble - May 13, 2017, 10:18 am

Yes we do allow RS botting

Flamecaster - May 14, 2017, 1:29 am

Would that be unfair use of resource though cause it uses lots of CPU/ram? Wait are these shared?

Been using a \$100 dedicated server from this company for a month now.

No issues, super fast support and certainly recommend it to anyone looking for a stable, fast and reliable Dedicated Server.

Also have a \$10 RDP, virtually no downtime and is very fast and stable aswell.

Huge vouch for HostBubble!

HostBubble is awesome and provides HQ services !

Lets break it down.

- 1) Great friendly staff
- 2) Fast customer support and Tech support (Had my server up in running 20 minutes after purchase)
- 3) HQ Offshore Dedicated Server
- 4) Affordable!

I've been pleased since day one. For anybody looking for a affordable dedicated server, look no further. Host Bubble is defiantly where its at!

Thank you HostBubble

BlueRDP is a fkn scamfest and I will tell anyone and everyone who tries to consider them to stay away!

As for these RDPs, I assume it's a user login based on the specs offered.
Cryptomining typically uses GPU but will you allow me to use:

It's important to know

Dear 'DontWorryBeHappy'

Cryptomining consumes 100% CPU, therefore you can only use Cryptomining on our dedicated servers

Excellent service, the seller also gave me some 1 rep + for trying out his product which worked perfectly.

The shared instance is exceptional and the performance you get is encouraging for the price of about 7 £, ALONGSIDE, is off-shore meaning that you don't have to trouble about getting your instance suspended or anything else as long as you follow their TOS :)

Another thing is, you don't gain administration access which is fine but also restricting you with what y'all do, but for low-end stuff like using MBA, it will work smoothly at your demand, regardless of the specifications.

RDP was good for the price and support was nice, however I can't seem to connect to it now and I didn't get the extra days promised because of the downtime, support was always friendly and would respond within a minute however I've been sitting in livechat for almost half an hour now and no response whatsoever. Bummer.

EDIT: The rep finally responded and promised me more than 5 extra days, didn't really mind waiting since the chat was just open in another tab while I was doing my own thing, nice support like always. HostBubble has my vouch :)

Greetings to all, Good news, RDP slots are available on fresh installed server. Don't wait place order today.

Brontes - December 6, 2018, 12:40 pm

Just bought this, how long does it take on average for the account information?

-VOID- - December 6, 2018, 3:43 pm

Yo bro,
Just ordered a RDP.
It's pending now
Looks promising

Thank you for your order, Shared RDP normally activated in 10-15 min & private bare metal dedicated servers need 2-8 hours time to activate. :)
Anyone can order dedicated server from here if you need more custom configuration let us know.

Can i Install Gammadyne myself for Mass Mailing? or any other mailing software?

Wings of Redemption - December 14, 2018, 12:24 pm

just ordered. hope i get my soon as well.
Got my RDP within a few minutes of purchasing with BTC.

Support was pretty fast to get my issue resolved.

Just to let you guys know: the rdp does not provide Admin access so if you need to contact support to get them to install it for you
