Thread: [How to hack a website - simple tutorial for a noob](#)

TraderJack - January 30, 2017, 7:47 am

Ok - I am a noob - straight up noob - I want to know how to hack a website or something.

I want to know simple tutorials but a big problemo is either I cannot trust these ebooks ppl offer for free.

I am scared and i can't buy any of these tutorials - i tried coding but ffs it's sooooo boring.

Like i want like a secret backdoor cut to SQL so i can (wreck havoc!!!!!!)

I'm joking.

Keyloggers - ahhhh tried that before from this website and thank god I didn't have a credit card till 15.

Dashed that laptop in a river - tried selling but the specs were old af.

For your information i am 18.

Pls help me out somebody.

It's like :

Quote:I want to build a house but I don't want to learn how to build a wall.

What do you do in this case? You pay for someone's services.

If you want to learn... LEARN!

This forum got plenty threads about website hacking, so take a look!

Use Google Dorks and SQLMap to learn the basics.

Learn SQL in that case. SQLmap does not teach you anything, it just automates the process. OP if you want to learn there are so many sites that show you how to do a variety of different approaches to "hacking" a website.

There are 100's of tutorials on this site alone.

Some things to lookup that are ezpz beginner areas are:

LFI

SQLi

Good luck OP.

Maxie - January 31, 2017, 8:37 am

Just start off by learning how to program. Don't become a skid. Don't be lazy. Hacking isn't for everyone and will take time. Trust me, I've learned that the hard way.

WitchKing - January 31, 2017, 8:52 am

Use Web Vulnerability analyser like [Acunetix](#) or [Burp Suite](#).

- 1.Find the presence of any vulnerability in a target website
- 2.Refer [CVE Databases](#),there you can find what type of attack is possible for particular vulnerability in that target website
- 3.Perform the attack

Note : without coding you cant do hacks and it will take time dude!

mkcreed123 - January 31, 2017, 11:56 am

there is one guy in marketplace who is teaching this

if you are willing to spend you can learn from him

thanks

Thanks everyone for commenting - 'preciate it

mutybyte - July 16, 2017, 7:24 am

I am also a learner and i like to use google. Also i like to get help/answer of my doubts by people. But main thing is first to use google

Here is what you need -->

h t t p : / / r esources . infosecinstitute . com / hacking-a-wordpress-site /

googlino1989 - July 16, 2017, 12:55 pm

Hi guys I am new here and I want hack this site tipstersportal.com.
