Thread: [Help installing script](#)

insanemofox - January 30, 2017, 10:31 am

Hello I'm having some trouble installing a script on one of my webpages. I was wondering if someone could give me some help or show me how to do it.

Thanks

Please include the script you are trying to install, that way more than one person can help.

Do you want to show the DB connection in the script, db name, table name etc etc... We cannot help without being able to see it.
