SoulMedic Health | Medical & Health Care Theme

I'm looking for this theme for free, 59\$ is too much for me to pay for it and I have one client that want this theme.

Can anyone share this with me if he have already?

Also can anyone suggest me some websites or forums where people share premium themes for free?

?

Anyone used this theme?? Best Regards

You are not charging your client enough if you can't afford a theme 59\$...

Using a "ripped" theme on clients website is not a good idea...
