Thread: [Phone with 2FA Bricked, Scared to Log Out](#)

HannibalBarca - January 31, 2017, 11:11 am

My phone bricked last night, and I had to revert it to a state from 3-4 months ago. Unfortunately this means my HF 2FA is no longer on GAuth. Does anyone have any suggestions? If I log out I won't be able to log back in

J?son - January 31, 2017, 11:13 am

<https://hackforums.net/gauth.php>

disable it

Pulz - January 31, 2017, 11:13 am

You should make sure you enable the GAuth backup feature; and consider using/adding your keys to the website app.

Disable your gauth now or you will risk losing your account.

SoulZeh - January 31, 2017, 11:33 am

Do as people have suggested by disabling it then you can install the google chrome app called Authy to use it again.

Here is a really good guide: <https://hackforums.net/showthread.php?tid=4794413>

+1 for Authy, you can set it up on all your devices (Chrome, iOS, Android, etc.) and sync/backup your 2FA keys for free. Easy to use app, and secure.

Good people above me answered you query, sir! I advise you to do as instructed. ?

dillanbackatit - February 1, 2017, 12:43 am

Always have a back up! I never mess with my main phone i always get worried something like this would happen lol
