Thread: [Wolf low poly art](#)

Motusora - January 31, 2017, 8:07 pm

it's my first time doing this ..

what i did is , i just watched a 3 minute tutorial in youtube then i started doing this .

critiques and comments are welcome

Do You Want To Bet - January 31, 2017, 8:08 pm

i can dig it im a fan of poly stuff

Better than whatever I could do, lol. Good job OP.

AvessoVision - January 31, 2017, 11:59 pm

I see some crispy/pixelated lines in between the shapes. Always convert your document to RGB before saving, especially in Illustrator. The shapes are too big, but it can be seen as a new style. I like the overall flow to the sides, it goes down well, good colour contrast as well. Here's my version of a low poly wolf.

Cheers.

thank you .

. i mostly post screenshots here (due to laziness / lack of time)

that explains of the pixelated parts .. haha ..

i don't understand why some parts become pixelated when zoomed out ..

I usually work on A4 since it's still a vector and I do not really need a bigger size than that. It's because your document is set on CMYK rather than RGB.

Looks good buddy, continue the good work.

YinYang - February 1, 2017, 12:51 am

I'm not a fan of the symetrical/mirriored low polys, but thats just my taste, the work itself is nice :)

did you use a reference image? If so can I see it?

Sorry but the work is mirrored, making it impossible for a miss shapen.

Cheers.

I think he means the shape of the Wolf itself, not the 'completeness' of it; like the top of its head/main seems protruded

It was done in December 22, 2015. It was also my first low poly.

Cheers.

just realized you're a graphic designer and trying to sell your services,

Now you seem like a dick coming onto someone else art thread and saying yours is better...

I am sorry if you've compiled your thoughts into such an opinion about someone.

But then again, you cannot stop people from having a grudge on you. As for your statement, I have made things clear for everyone, as replies kept going, as I still have my manners, I reply to everyone's concerns. Please stick to the topic from now on.

Cheers.
