Thread: [\[Scan/Runtime FUD\]\[C++\]LotusCrypt Crypting Service|Private RunPE|25-54kB stub|20\\$ BTC\]](#)

eKKiM - February 1, 2017, 2:13 pm

Notes

LotusCrypt is a service. We do not sell a crypter application. You pay per crypt.

LotusCrypt supports x86, x64 binaries

We have different stubs for each CPU architecture. (32bit and 64bit)

Stub uses private RunPE implementation and payload is protected by our 3 staged loader.

Private stubs can be made at request.

Any other questions? Contact us!

Sales

Price is 20 USD, payment in BTC only.

Contact us via:

live:lotuscrypt

lotuscrypt@exploit.im

Please verify the account names and be aware of scammers!

Runtime Scan Result

Runtime FUD! Tested on: Microsoft Security Essentials, Avast, DrWeb, Avira, AVG, 360 Total Security, Bitdefender, ESET, GData and Kaspersky!

Check the result of a Zyklon HTTP bot here:

<https://www.chk4run.com/index.php?do=result&id=18>

TOS

1. LotusCrypt is intended for research, education and commercial purposes and should be used as so.

2. All sales are final.

3. LotusCrypt works as it is described by the time of writing.

Given the nature of the product and it's current "beta" status, we can currently not guarantee a certain detection time nor

full compatibility with all types and forms of executables, other than those in the product description.

4. The LotusCrypt Team can not be held accountable for any of the following:
 - any damages or losses caused to your own system or the system of others while using this product;
 - the actions performed by its buyers;
 - * loss of data caused by using this product.
5. The LotusCrypt Team does not provide support for anything you intend to do with the product. Bugreports or suggestions can however be filed with our commercial team, if they are well documented.
6. The LotusCrypt Team holds the right to discontinue development at any given time without prior notice, and holds no responsibility towards its users dependability on the product.
7. The LotusCrypt Team preserves the right to refuse any request it receives without any further disclosure of information.
8. Any exchanged payment or contact information will be used only for the transaction and will not be stored on any of our servers.

eKKiM - February 7, 2017, 8:40 am

Made some changes to provide better stability and longer FUD times!

M O D E R N - February 7, 2017, 8:41 am

Possible to get a vouch copy?

Tee Plow - February 8, 2017, 3:11 pm

hey

any vouch copy available ??

i can do runtime scan on some AV's

eKKiM - February 9, 2017, 9:15 am

(Feb 8, 2017 04:11 PM) Tee Plow Wrote: [\[CITE\]](#) hey

Add me on Skype or XMPP please.

SameFish95 - February 11, 2017, 1:01 pm

Would like to test this out with a # stub if you offer a vouch copy.

eKKiM - February 13, 2017, 7:42 am

Add me on Skype or XMPP maybe we can work something out.

drewkasp - February 13, 2017, 12:44 pm

This is a pretty decent Crypted stub, Good size and still FUD after 3 days, shows its not a shared stub.

eKKiM - February 14, 2017, 2:15 pm

(Feb 13, 2017 01:44 PM) drewkasp Wrote: [\[CITE\]](#) This is a pretty decent Crypted stub, Good size and still FUD after 3 days, shows its not a shared stub.

Thx for the vouch. Sadly our stub got detected today. But we refudded it within the hour!

We are closing are beta for native stubs very soon. So hurry if you want a cheap crypt!

We have added a runtime scan:

Tested on: Microsoft Security Essentials, Avast, DrWeb, Avira, AVG, 360 Total Security, Bitdefender, ESET, GData and Kaspersky!
All FUD!!

Check the result of a Zyklon HTTP bot here:

<https://www.chk4run.com/index.php?do=result&id=18>

VirtualMon3y - February 15, 2017, 10:06 am

Nice result Op. Good luck with your project.

Codefuser - February 15, 2017, 10:33 am

Note that the scanner does not have internet access atm and that means that it is less runtime detected than it would truly be.

Internet access will be added later to the scanner.

eKKiM - February 15, 2017, 10:37 am

(Feb 15, 2017 11:33 AM)Codefuser Wrote: [\[CITE\]](#) Note that the scanner does not have internet access atm and that means that it is less runtime detected than it would truly be.

Internet access will be added later to the scanner.

We did manual test with Microsoft Security Essentials, Kaspersky, ESET, Avira and AVG with Internet Connection.

And we got the same results.

KingMidas - February 15, 2017, 11:06 am

Holy crap. I knew this was going to be good when I saw your name but these are probably the best Scantime/Runtime results I have seen in a very long time.

Tested them on my VM's and didn't get any detections on MSE, ESET and Kaspersky.

Great support too. Had a minor problem but they fixed it the same day. It's Beta, shit happens ;-)

Very HQ service. Very worth the coin!

Midas

Gigabot - February 17, 2017, 9:11 am

Awesome service and hes online basically 24/7

I recommend this service %100!

SameFish95 - February 18, 2017, 8:22 am

Service is amazing! Worth surely more than the 5usd he asks.

100% FUD and the support is 10/10. Recommended.

eKKiM - February 21, 2017, 3:44 pm

After having a 20 days beta period with great feedback from our users. We can now proudly present our HQ crypting service!

Added you on jabber! (fire_bender@exploit.im)

blackvudu1 - March 7, 2017, 3:21 pm

Just added you on Skype, confirm and let me see how great this is!!!

Sam0883 - *April 5, 2017, 4:57 pm*

added on jabber ready to get this done!

Imlerith - *April 12, 2017, 6:00 am*

do i lose persistance if you crypt my stub ?

Flacon - *April 13, 2017, 6:42 pm*

do you even exist tried adding you but no response for days!

Knight King - *July 17, 2017, 7:36 am*

Hi,

Is this service still available?. I would like to give it a try

Lextian - *December 11, 2017, 11:40 pm*

Interested in this service also, shoot me a PM would like to test with #, Thanks.

Ren And Stimpy - *December 12, 2017, 12:24 pm*

LMAO really.... I even know how to see if a person is not around any more....
