Looks great but I don't know, it looks too good to be true, if you know what I mean. Also, AV scan would be great!

Trillium - February 1, 2017, 2:21 pm

@whiteSEC

I fully can understand your meaning but when you have troubles to believe that this is clean you can debug this program byte by byte and scan it everywhere I give you my word you will find nothing bad

in this program. It only can happen that this program display some detections when you scan it because it includes functions like 'Random EntryPoint' which is used for example by Crypters too and such functions can cause False/Heuristic Detections ?

Hi TheWarOwl thank you very much for your nice feedback post it's great to hear that the Program is useful for you ?

I just updated the Download URL with a new Download URL I added to the package the needed "OCX Files" and the "Trillium Security OCX Registrator.exe" now you shouldn't get any OCX Errors again when you try to run this Program ?

Best Regards

Trillium needs to come online more often i mean what kind of shitty ass support please he doesnt explain so many things to you then when you ask questions he runs off....Thats why he stays offline for so long because he is shit!.. nice product though he just needs to be a better support.

Discomfort - August 28, 2017, 7:22 pm

Wow, this is terrific for any new or even old sysadmin and penn tester, or even the black hats. Great looking tool. I will pick it up. It's so versatile. Why are you releasing it for free if you don't mind my curiosity?

Hi Discomfort, thank you very much for your nice feedback post. ? The cause why I released it for free is because not everybody have money to buy Premium Software and thats why I made a useful program which everybody can use for free. ?

I'm Stanley HF's helper bot. This OP (original poster) of this thread wants everyone to see this page and has elected to bump it to the top of the showthread listing. Since HF doesn't want a ton of LQP (Low Quality Posts) this is the best method of bumping your content. There is a small ?yte fee for each bump. Any OP can bump any of their threads on HF from the linked icon on the top of their first post.

If you haven't already read the first post of this thread we encourage you to do so.

Thanks,
