Thread: [\(\\$40 > \\$800!\) Good Luck > Bad Luck > Good Luck...](#)

Windows 98 - February 1, 2017, 6:34 pm

So, let's begin storytime.

I started with \$40 a few days ago. I had it laying around with no use, so I threw it right into Busta!

Well....I walked out with \$400! I felt great.

Today, I was watching someone play Blackjack online. I decided to try it out with \$50. I lost that in two hands...

I tilted (what else)...and went \$50 into Bustabit to "make it back" (what they all say)! I lost it...so I deposited \$150 and said "Well, this will be EASILY enough bankroll to make it back...right?". Lost it!

I was down to exactly \$100 in my wallet from that \$400 the few days ago (I spent \$50).

I deposited into Satoshi, as I haven't played there in AGES.

I turned it into \$700, but I only deposited my \$400 and kept playing with the \$300 hoping to get up to 1 BTC. I was just fucking around with that money (regret it now) and lost it. I was doing like \$200 bets LOL.

Anyway, so yeah. I'm sitting here with my \$400 once again!

tldr: \$40 > \$400 > \$100 > \$700 > \$400

Haha nice mate, just deposit that 400\$ and spent it on a new pair of shoes or a new jacket.

Nice x10 win mate, gl!

1 mine, like 10k bets and when I lost I just hit 2x twice and played that twice hitting like 5 mines LOL.

Was yoloing hard asf, but I was like "eh wont lose twice in a row" LOL
