Thread: [\[RELEASE\] SynCrology | Plaintext Controlled RAT | 2/35](#)

JoshuTee - February 2, 2017, 12:03 pm

SynCrology ~ Plaintext Controlled RAT

SynCrology is a simple RAT that can be controlled from a paste website, such as PasteBin
JustPaste.It

Pasted.co

Pastie

Important, this is not a usual RAT. This is a one way RAT, this means that you can purely send commands to your client(s), but not backwards.

Also, note that this is a rather early release. Newer releases will include encryption and more awesome features ?

Every generated client file has unique commands and filenames!

Features: Show message box

Update itself

Download and execute

Uninstall

Screenshot:

The RAT itself doesn't really have a GUI, as it's controlled by editing a plaintext page.

Here's a builder screenshot:

Virus scans

Spoiler [\(Click to View\)](#)

Virus scan of builder

Virus scan of generated client

I'm only giving this away to members whom I trust. For a download link, please send me a PM and I will decide if I deem you trustworthy. If yes, you will receive the link ASAP ?

(.)_(.) - February 2, 2017, 12:09 pm

Oh finally the wait has an end! Please send link... ?

Last_viking - February 2, 2017, 12:35 pm

I would like to know more about his !!!
Pm sent

- **Error 404** - - February 2, 2017, 12:35 pm

Would love to give it a try
Sending you a PM now

*****Wolf***** - February 2, 2017, 12:42 pm

Could i get this bro, thanks in advance!Sending a PM now!

Purple Kief - February 2, 2017, 12:51 pm

Nice of you to release this, hopefully you keep it as exclusive as possible.
I'll eventually make a guide on it if it goes public and is good.

XSSPLOIT - February 2, 2017, 12:57 pm

Looks interesting, some guy made a pastebin rat earlier for free

JoshuTee - February 2, 2017, 3:08 pm

PM's have been replied to! Have fun guys! :)

(Feb 2, 2017 01:51 PM)Purple Kief Wrote: [CITE](#) Nice of you to release this, hopefully you keep it as exclusive as possible.

Thank you. Yes, I'll take care that this stays exclusive. Do you maybe want a copy?

Malicious Intent - February 2, 2017, 7:17 pm

Nice. I was looking forward to this release. I would like to give it a shot. Thanks OP

urbandesi - February 2, 2017, 9:53 pm

looking nice

good luck man :)

JaGLY - February 2, 2017, 11:43 pm

Absolutely fabulous name for such a nice project ?

Can't wait to try it out OP! Thanks for releasing this, also i have been waiting for this.
Keep the good work up. ?

JoshuTee - February 3, 2017, 6:40 am

Keep the good work up. ?
Thanks for everything :) have I sent it to you yet?

PICwarrior381 - February 3, 2017, 8:32 am

Can I get this man?

Thank you looks so amazing !

JaGLY - February 3, 2017, 9:56 am

(Feb 3, 2017 07:40 AM)JoshuTee Wrote: [\[CITE\]](#) Thanks for everything :) have I sent it to you yet?
Nope still waiting for this bro?

SIM-3124535 - February 3, 2017, 10:06 am

This reminds me of an app I made in .NET which was controlled using text files on my webhost... it had higher detection rate than usual rats...

TheWarOwl - February 3, 2017, 10:10 am

I'll check this out! will this work with ghostbin?

JoshuTee - February 3, 2017, 11:29 am

(Feb 3, 2017 11:10 AM)Piero-Bird Wrote: [\[CITE\]](#) I'll check this out! will this work with ghostbin?
I don't know exactly. It works with any paste site, as long as you can create an account and edit the paste

IMPORTANT

There was a number of bugs in the initial release. Everybody who downloaded this, please re-download it from the exact same location, it's fixed now!

Tee Plow - February 3, 2017, 11:55 am

seem like a good project
good luck with it OP

*****W0lf***** - February 3, 2017, 12:05 pm

Got the rat , test it and work like a charm,Thanks so much!

JoshuTee - February 3, 2017, 12:17 pm

(Feb 3, 2017 01:05 PM)++W0lf++ Wrote: [\[CITE\]](#) Got the rat , test it and work like a charm,Thanks so much!

Thanks a lot and glad it works for you! ?

warpje - February 3, 2017, 2:58 pm

Nice release! Great herder ;)
Does it accept raw input from all sites?
And should be an easy FUD just rebuild and scan again and rename the functions etc..

Nutrition - February 3, 2017, 5:24 pm

Would I be able to get a copy of this? Very good work!

urbandesi - February 3, 2017, 10:37 pm

I want this pls release in public :)

Crash™ - February 3, 2017, 10:48 pm

Love the plaintext field. Please provied me with an option.
Lookforward to hearing back,

urbandesi - February 4, 2017, 3:13 am

i also want to test it.....but.....

JoshuTee - February 4, 2017, 4:13 am

And should be an easy FUD just rebuild and scan again and rename the functions etc..

Thanks! Yes, it supports any plaintext site, such as pastebin, you also need to be able to edit your plaintext post in order to issue commands

Computerjul - February 6, 2017, 1:05 am

Will do some tests and give a feedback soon :)

Best regards

Nutrition - February 9, 2017, 2:47 am

Sorry, I think I understand this but just making sure. Is this just a regular smaller feature rat, that you just execute commands with via pastebin? What are the benefits with such? Am I missing something?

JoshuTee - February 9, 2017, 2:12 pm

Here's a tutorial video: <https://sendvid.com/gfnmv4jw>

I hope this makes things a bit clearer ?

If you still have questions just shoot me a PM!

JoshuTee - February 13, 2017, 3:45 am

This will be taken down for an indefinite amount of time in three days, last chance!

Computerjul - February 13, 2017, 3:56 am

JoshuTee - February 13, 2017, 3:57 am

(Feb 13, 2017 04:56 AM)Computerjul Wrote: [\[CITE\]](#) Tell us :)

What do you mean?

BlackPanth3R - February 13, 2017, 7:42 am

Could you perhaps let me check it out?

JoshuTee - February 23, 2017, 3:13 pm

Just out of interest, who is still interested in this? I would start with updates if the request was high enough

The Notorious B.I.G. - February 23, 2017, 4:41 pm

(Feb 23, 2017 04:13 PM)JoshuTee Wrote: [\[CITE\]](#) Just out of interest, who is still interested in this? I would start with updates if the request was high enough
Could you send me the link? ?

Sure thing, I've sent it to you per PM!?

JoshuTee - February 26, 2017, 3:26 am

Just a heads up: I'm working on a GUI builder plus encryption!

Surge0n - February 27, 2017, 6:42 am

Serious project you made here dude. Nice work

force123 - February 27, 2017, 11:34 am

missing the download, you can drop it?

BlackPanth3R - March 18, 2017, 12:01 am

Yes dito! Please Release Finally!

(was lange währt wird endlich gut!) ?

Pe?cil - April 24, 2017, 8:37 pm

I like your project mate.

Mr. Kim - April 30, 2017, 10:19 am

Looks interesting. Never seen something like this before, how does it work? Does it just query the pastbin post for batch commands or?

JoshuTee - April 30, 2017, 10:43 am

(Apr 30, 2017 10:19 AM)M?m?ry Wrote: [\[CITE\]](#) Looks interesting. Never seen something like this before, how does it work? Does it just query the pastbin post for batch commands or? It parses the code on pastebin (it doesn't have to be pastebin) for its specific commands and executes them. For every generated client the command will be different

wait wait wait wait :D

poufpater - May 5, 2017, 12:45 pm

oh thats a pretty neat idea, i'd like to see where you take this project :)

JoshuTee - May 9, 2017, 8:43 am

Announcement

Due to personal problems I cannot continue development and distribution of Syncrology. I'm sorry this happened. There's no other way for me.

Thank you for understanding

Kjetil - May 9, 2017, 10:19 am

its not a rat but some sort of botnet

Last_viking - May 13, 2017, 12:38 pm

I have sent you thousand times pm's
U never took time to read them also

Mr. Kim - May 13, 2017, 1:06 pm

(May 13, 2017 12:38 PM)last viking Wrote: [\[CITE\]](#) I have sent you thousand times pm's
