Hello guys so today I'm bringing you a new method (hopefully it hasn't been posted here on the forums).

This method is easy to setup and the site we are using is trusted and the best part of it is that you can cashout at 1\$ and this accepts most of the online payments so you can earn every dollar you make! So let's start:

- 1- Register to this site [www file -upload.cc/](http://www.file-upload.cc/)
 - 2- Enter your info there and choose a payment method
 - 3- now start uploading files and spread them, and whenever someone downloads your file you will earn money (with USA downloads as the highest rate), now this depends on how patient and good you are with spreading your download links and what type of content you have uploaded.
- Examples of how you can autopilot the money:
- i) make a youtube channel (preferably with adsense for more profit) and upload some android games hacks or pc programs cracks and upload that hack/crack to the site we registered for above, then shorten them by adfly or shortest or any other link shortening site and once someone downloads your content you'll earn money on the site (adsense and adfly money as well if you use them)
 - ii) use a vpn and change IP to USA (for best profit) then start downloading your file on another incognito browser (that doesnt save cookies) or using TOR which is easy profit.
 - iii) you can use your referral link and spread it for people to join which will extend your earnings

Easy profit huh? Needs a bit of work and you'll start making money right away, the best part of it is that YOU CAN CASHOUT MONEY AT 1\$ MINIMUM WHICH IS BEAST . If you need any help , feel free to post here .

Site's payments proof: [www file-upl oad .cc /?op=pa yment_proof](http://www.file-upload.cc/?op=payment_proof)

Note : Please Remove Spaces on the links , I gave .
