Ease of use; 9/10.

The program for me was a lot easier to use than I could've expected. Nice and very easy to navigate the program to build etc

Layout; 7/10.

The layout of Venom Logger is very basic, For anyone new to keyloggers/stealers this program would be a good base for you to start at. Nice and clean UI

##honest part

Stability; 7.5/10.

I was having a little trouble getting the sending of the logs tested with a GMAIL account. I managed to get it working with a test site though. Please do come in mind that I'm new to keyloggers and have no experience or had never asked for help

Other than my personal opinion and very minimal knowledge on software like this I think it's safe to say this is worth the investment :)

Here is my review of the product.

GUI/Layout: 8/10

- The GUI is very clean, easy to navigate, would be great if you're a first time user!

Functionality: 10/10

- SMTP, FTP, and Locally saved logs are working perfectly
- Log Settings is accurate for screenshot intervals
- Working Startup
- Working installation for both Current User & All Users
- Email Confirmation upon installation worked
- After testing it overwrote the existing installation as expected
- USG working
- Fake error message worked
- Binding and spoofing worked as expected
- Assembly works
- WORKING STEALERS: Firefox, Chrome, Outlook
- Stole everything from my testing
- Other small features worked decently well also

Price: 10/10

- The price of the software of \$30 for Unlimited package is SUPER LOW and worth!

Final Words: This logger is definitely one of the best, if not the best on the market right now. So happy to be using it!

OVERALL RATING: 9/10!

Any news about persistence? Will I get any guarantee that it will actually work for at least couple of

weeks in a row. Bought some crappy keylogger here before and it started to malfunction once the PC has restarted. Looking for something reliable and trustworthy, how long are you going to keep this project alive? Need to log for at least 2-3 months, but some sellers here tend to come&go and in the end they don't give a fuck about their customers and their licences.

Cheers!

With our keylogger, it really depends on how you set it up. If you change the assembly, bind it to a file etc. Until we refud the program, we recommend using a crypter along side it.

We are working hard to get it to be refud with out team. In my experience, with a crypter and assembly change etc, I got around a week with run time. If you need any help, we are sure to help. Either by Discord, website Live Chat, or PM.

Thanks for being honest, unfortunately it's way to short to even consider buying it. Need something that will work consistently and without any hiccup for a month or so - the more it works, the more I get info from keyloggs.

Ayy, no worries my dude.

Come back in about 2 weeks when we refud the program. You'll get a lot better results from that.

I'll use a crypter alongside, so I don't give a damm about AVs detecting the stub, all I want is to make sure the proccess of your keylogger won't vanish. Eagerly waiting for some update and maybe will give it a try.

~ Vouch Copy Review ~

So basically Tom asked me too review his HQ Product which i was happy too do, i've had experience with keyloggers and by far this is one of the most simple / easy too use it's very noob friendly even if you have never heard of a keylogger before it's very simple too use.

I also wanted to say that every feature works flawlessly. I've done extensive testing on VM's and it works like a charm. The Keylogger is constantly updated and passes VirusTotal tests.

GUI Rating

I'd say a solid 9 / 10

also when you hover over the item it gives information on what that feature does etc... The only flaw too this is that you arent able too move it around / maximize it that's just me being picky.

Code i.imgur.com/jNLudOO.png

~ Rating the Functionality ~

I'd say 8.5 / 10

Had a little trouble using gmail as a storing logs via email especially gmail and hotmail / outlook but it still works fine once you get it working, haven't tested FTP upload yet but when i do i'll make sure too come back and edit this, Saving logs locally is a 10 / 10 i had no problems with the logs they all saved with no errors. All features also seemed too work, i had no issues with any of them. All the stealers are working, chrome, firefox etc... Yeah functions very well i guess.

~ Price ~

A solid 10 / 10

would recommend you purchase it, the price is reasonable comparing it too other keyloggers.

~ Support ~

Will rate a 10 / 10

i jumped on their site too see if they actually support / help you and about 1 - 2 mins i started talking too a live chat agent who answered all my questions i had in relation too the KeyLogger, great service. Also it has a small tutorial on how too use the keylogger on site here is the link: Code venomlogger.com

No this program is not made to be completely FUD. It does have USG which helps keep detection minimal but we would recommend using a crypter. Feel free to PM me here or on Skype if you have any more questions or need a recommendation for which crypters are the best.

Ease of use; 9/10.

The program for me was a lot easier to use than I could've expected. Nice and very easy to navigate the program to build etc

Layout; 7/10.

The layout of Venom Logger is very basic, For anyone new to keyloggers/stealers this program would be a good base for you to start at. Nice and clean UI

##honest part

Stability; 7.5/10.

I was having a little trouble getting the sending of the logs tested with a GMAIL account. I managed to get it working with a test site though. Please do come in mind that I'm new to keyloggers and have no experience or had never asked for help

Other than my personal opinion and very minimal knowledge on software like this I think it's safe to say this is worth the investment :)

Here is my review of the product.

GUI/Layout: 8/10

- The GUI is very clean, easy to navigate, would be great if you're a first time user!

Functionality: 10/10

- SMTP, FTP, and Locally saved logs are working perfectly
- Log Settings is accurate for screenshot intervals
- Working Startup
- Working installation for both Current User & All Users
- Email Confirmation upon installation worked
- After testing it overwrote the existing installation as expected
- USG working
- Fake error message worked
- Binding and spoofing worked as expected
- Assembly works
- WORKING STEALERS: Firefox, Chrome, Outlook
- Stole everything from my testing
- Other small features worked decently well also

Price: 10/10

- The price of the software of \$30 for Unlimited package is SUPER LOW and worth!

Final Words: This logger is definitely one of the best, if not the best on the market right now. So happy to be using it!

OVERALL RATING: 9/10!

- Stole everything from my testing
- Other small features worked decently well also

Price: 10/10

- The price of the software of \$30 for Unlimited package is SUPER LOW and worth!

Final Words: This logger is definitely one of the best, if not the best on the market right now. So happy to be using it!

OVERALL RATING: 9/10!

(Feb 8, 2017 05:50 PM)HardFormat Wrote: [\[CITE\]](#) ~ Vouch Copy Review ~

So basically Tom asked me too review his HQ Product which i was happy too do, i've had

experience with keyloggers and by far this is one of the most simple / easy too use it's very noob friendly even if you have never heard of a keylogger before it's very simple too use.

I also wanted to say that every feature works flawlessly. I've done extensive testing on VM's and it works like a charm. The Keylogger is constantly updated and passes VirusTotal tests.

GUI Rating

I'd say a solid 9 / 10

also when you hover over the item it gives information on what that feature does etc... The only flaw too this is that you arent able too move it around / maximize it that's just me being picky.

Code i.imgur.com/jNLudO0.png

~ Rating the Functionality ~

I'd say 8.5 / 10

Had a little trouble using gmail as a storing logs via email especially gmail and hotmail / outlook but it still works fine once you get it working, haven't tested FTP upload yet but when i do i'll make sure too come back and edit this, Saving logs locally is a 10 / 10 i had no problems with the logs they all saved with no errors. All features also seemed too work, i had no issues with any of them. All the stealers are working, chrome, firefox etc... Yeah functions very well i guess.

~ Price ~

A solid 10 / 10

would recommend you purchase it, the price is reasonable comparing it too other keyloggers.

~ Support ~

Will rate a 10 / 10

i jumped on their site too see if they actually support / help you and about 1 - 2 mins i started talking too a live chat agent who answered all my questions i had in relation too the KeyLogger, great service. Also it has a small tutorial on how too use the keylogger on site here is the link: Code venomlogger.com

Ease of use; 9/10.

The program for me was a lot easier to use than I could've expected. Nice and very easy to navigate the program to build etc

Layout; 7/10.

The layout of Venom Logger is very basic, For anyone new to keyloggers/stealers this program would be a good base for you to start at. Nice and clean UI

##honest part

Stability; 7.5/10.

I was having a little trouble getting the sending of the logs tested with a GMAIL account. I managed to get it working with a test site though. Please do come in mind that I'm new to keyloggers and have no experience or had never asked for help

Other than my personal opinion and very minimal knowledge on software like this I think it's safe to say this is worth the investment :)

GUI/Layout: 8/10

- The GUI is very clean, easy to navigate, would be great if you're a first time user!

Functionality: 10/10

- SMTP, FTP, and Locally saved logs are working perfectly
- Log Settings is accurate for screenshot intervals
- Working Startup
- Working installation for both Current User & All Users
- Email Confirmation upon installation worked
- After testing it overwrote the existing installation as expected
- USG working
- Fake error message worked
- Binding and spoofing worked as expected
- Assembly works
- WORKING STEALERS: Firefox, Chrome, Outlook
- Stole everything from my testing
- Other small features worked decently well also

Price: 10/10

- The price of the software of \$30 for Unlimited package is SUPER LOW and worth!

Hello all! Today I bought this Logger and I'm highly satisfied with it!

its very simple to use and unlike other loggers (I had Many problems with others Products sold here)

But this Product works very well and its Stable and has no delay in the logs (unlike the other two I purchased before) and this product is been sold for a very reasonable Price and the UI is damn attractive and noob friendly

you can see in the above screenshot :) it fits anyone's eyes unlike those loggers and newbie

friendly and I 100% recommend to any of you to buy this product and they provide the best support and have a good experience team for support this is awesome customer service !
thanks again for this amazing product Big Vouch From me!

(Feb 8, 2017 05:50 PM)HardFormat Wrote: [\[CITE\]](#) ~ Vouch Copy Review ~

So basically Tom asked me too review his HQ Product which i was happy too do, i've had experience with keyloggers and by far this is one of the most simple / easy too use it's very noob friendly even if you have never heard of a keylogger before it's very simple too use.

I also wanted to say that every feature works flawlessly. I've done extensive testing on VM's and it works like a charm. The Keylogger is constantly updated and passes VirusTotal tests.

GUI Rating

I'd say a solid 9 / 10

also when you hover over the item it gives information on what that feature does etc... The only flaw too this is that you arent able too move it around / maximize it that's just me being picky.

Code [i.imgur.com/jNLudO0.png](https://imgur.com/jNLudO0.png)

~ Rating the Functionality ~

I'd say 8.5 / 10

Had a little trouble using gmail as a storing logs via email especially gmail and hotmail / outlook but it still works fine once you get it working, haven't tested FTP upload yet but when i do i'll make sure too come back and edit this, Saving logs locally is a 10 / 10 i had no problems with the logs they all saved with no errors. All features also seemed too work, i had no issues with any of them. All the stealers are working, chrome, firefox etc... Yeah functions very well i guess.

~ Price ~

A solid 10 / 10

would recommend you purchase it, the price is reasonable comparing it too other keyloggers.

~ Support ~

Will rate a 10 / 10

i jumped on their site too see if they actually support / help you and about 1 - 2 mins i started talking too a live chat agent who answered all my questions i had in relation too the KeyLogger, great service. Also it has a small tutorial on how too use the keylogger on site here is the link: Code venomlogger.com

Tom always delivers HQ Products so do not hesitate too buy any of his products especially this one! GLWS Tom :)

The program for me was a lot easier to use than I could've expected. Nice and very easy to navigate the program to build etc

Layout; 7/10.

The layout of Venom Logger is very basic, For anyone new to keyloggers/stealers this program would be a good base for you to start at. Nice and clean UI

##honest part

Stability; 7.5/10.

I was having a little trouble getting the sending of the logs tested with a GMAIL account. I managed to get it working with a test site though. Please do come in mind that I'm new to keyloggers and have no experience or had never asked for help

Other than my personal opinion and very minimal knowledge on software like this I think it's safe to say this is worth the investment :)

Here is my review of the product.

GUI/Layout: 8/10

- The GUI is very clean, easy to navigate, would be great if you're a first time user!

Functionality: 10/10

- SMTP, FTP, and Locally saved logs are working perfectly
- Log Settings is accurate for screenshot intervals
- Working Startup
- Working installation for both Current User & All Users
- Email Confirmation upon installation worked
- After testing it overwrote the existing installation as expected
- USG working
- Fake error message worked
- Binding and spoofing worked as expected
- Assembly works
- WORKING STEALERS: Firefox, Chrome, Outlook
- Stole everything from my testing
- Other small features worked decently well also

Price: 10/10

- The price of the software of \$30 for Unlimited package is SUPER LOW and worth!

Final Words: This logger is definitely one of the best, if not the best on the market right now.
So happy to be using it!

OVERALL RATING: 9/10!

OVERALL REVIEW: 11/10

Functionality: 10/10 - My pet bird could get this to work, it's so simple and effective.

Price: 11/10 - WTF, like the price this is going at is literally as comparable to a Bugatti Veyron going for \$100. This is such a steal.

Customer Support: 10/10 - This dude has amazing response time, and for one person, he does a damn good job, it's almost like hes a 24/7 customer support line, does this dude ever sleep? He must have a clone for making programs, and a clone for customer response.

This is insane, I just purchased this not too long ago, and the last thing I could do is think second about whether it was worth it. I wish I could buy this thing a second time, that's how satisfied I am.

Usually when you buy something, you're sorta gambling, you don't always know what the outcome will be. Buying Venom Logger is a 100% guarantee of satisfaction, if not beyond satisfied. This logger is ridiculously good, and for the going price?? Wow, OP must be scamming himself, cause these prices are a steal, this guy really cares about the quality and reputation of what he's selling, and not making money.

If you haven't bought this yet, you might just be making the biggest mistake of your life. Seriously, coming from a fellow buyer who had doubts, I'm beyond satisfied, you don't need to hit the back button, or continue searching, or even bother comparing this to other loggers, trust me, this is the one, this is what you want.

----- Seriously just buy this, the worst feeling in the world is regret, and that's what you'll feel if you turn back. Look no further, I promise this is what you want. I'm still so surprised by the quality of this, this is beyond what you'd find on hackforums, this is like some government quality type tool. Impressed af.

(Feb 8, 2017 05:50 PM)HardFormat Wrote: [\[CITE\]](#) ~ Vouch Copy Review ~

So basically Tom asked me too review his HQ Product which i was happy too do, i've had experience with keyloggers and by far this is one of the most simple / easy too use it's very noob friendly even if you have never heard of a keylogger before it's very simple too use.

I also wanted to say that every feature works flawlessly. I've done extensive testing on VM's and it works like a charm. The Keylogger is constantly updated and passes VirusTotal tests.

GUI Rating

I'd say a solid 9 / 10

also when you hover over the item it gives information on what that feature does etc... The only flaw too this is that you arent able too move it around / maximize it that's just me being picky.

Code i.imgur.com/jNLudO0.png

~ Rating the Functionality ~

I'd say 8.5 / 10

Had a little trouble using gmail as a storing logs via email especially gmail and hotmail / outlook but it still works fine once you get it working, haven't tested FTP upload yet but when i do i'll make sure too come back and edit this, Saving logs locally is a 10 / 10 i had no problems with the logs they all saved with no errors. All features also seemed too work, i had no issues with any of them. All the stealers are working, chrome, firefox etc... Yeah functions very well i guess.

~ Price ~

A solid 10 / 10

would recommend you purchase it, the price is reasonable comparing it too other keyloggers.

~ Support ~

Will rate a 10 / 10

i jumped on their site too see if they actually support / help you and about 1 - 2 mins i started

talking too a live chat agent who answered all my questions i had in relation too the KeyLogger, great service. Also it has a small tutorial on how too use the keylogger on site here is the link: Code venomlogger.com

The program for me was a lot easier to use than I could've expected. Nice and very easy to navigate the program to build etc

Layout; 7/10.

The layout of Venom Logger is very basic, For anyone new to keyloggers/stealers this program would be a good base for you to start at. Nice and clean UI

##honest part

Stability; 7.5/10.

I was having a little trouble getting the sending of the logs tested with a GMAIL account. I managed to get it working with a test site though. Please do come in mind that I'm new to keyloggers and have no experience or had never asked for help

Other than my personal opinion and very minimal knowledge on software like this I think it's safe to say this is worth the investment :)

The program's layout is basic, and it has all the functions you need and everythings working.

Even thoe i had a little bit of issues getting it working in the beginning because its my first time using a logger,

this logger is very good and is definetly worth buying and using for your needs, i strongly recommend people to get this logger :)

(Feb 1, 2017 07:00 PM)Fucci Wrote: [\[CITE\]](#) I received a vouch copy of Venom Logger v3.1 earlier this week.

Here is my review of the product.

GUI/Layout: 8/10

- The GUI is very clean, easy to navigate, would be great if you're a first time user!

Functionality: 10/10

- SMTP, FTP, and Locally saved logs are working perfectly
- Log Settings is accurate for screenshot intervals
- Working Startup
- Working installation for both Current User & All Users
- Email Confirmation upon installation worked
- After testing it overwrote the existing installation as expected
- USG working
- Fake error message worked
- Binding and spoofing worked as expected
- Assembly works
- WORKING STEALERS: Firefox, Chrome, Outlook
- Stole everything from my testing
- Other small features worked decently well also

Price: 10/10

- The price of the software of \$30 for Unlimited package is SUPER LOW and worth!

Final Words: This logger is definitely one of the best, if not the best on the market right now.
So happy to be using it!

OVERALL RATING: 9/10!

Hello all! Today I bought this Logger and I'm highly satisfied with it!

its very simple to use and unlike other loggers (I had Many problems with others Products sold here)

But this Product works very well and its Stable and has no delay in the logs (unlike the other two I purchased before) and this product is been sold for a very reasonable Price and the UI is damn attractive and noob friendly

you can see in the above screenshot :) it fits anyone's eyes unlike those loggers and newbie friendly and I 100% recommend to any of you to buy this product and they provide the best support and have a good experience team for support this is awesome customer service !

thanks again for this amazing product Big Vouch From me!

Apologies if this has already been asked, I searched and didn't find the answer:

- 1) Can installation be done remotely and silently with no information or popups presented to the remote user?
- 2) Will this log for all users on a Windows system, or only the installation user?
- 3) If I set this to run at startup, will the target user be notified in any way (UAC popups, etc.)?

Need to use in a corporate monitoring situation where the target user is totally unaware.

i saw this tool in beta for months after i wanted to purchase it, but i instead purchased the silentbytes instead, but looking at this tool is making me want to buy it even more because of how well the material is laid out nice and neat.

all of the buttons look to be found in the correct order and the correct tabs look similar to the others, every thing looks easy to find, over all i'll buy it. anyway i vouch for this product too A++.

Xaliy - March 18, 2017, 7:47 am

Look very nice the keylogger .. I'm glad to buy her soon;). good luck ..

Cyam - March 18, 2017, 10:04 am

Got some questions regarding the product before purchasing? Can you reply on your Skype?

I know you always have a HQ product so I'm definitely interested.

holybishop - March 21, 2017, 12:44 am

Tom the cruiser, I am looking to buy your logger but I have some questions, is the logger FUD or partially UD, if it gets detected how long does it take before Re-FUD?

2) Is the browser password recovery working ok? (Recovery is most important to me, if it does not recover, is not ok for me)

3) What versions of windows does it recover from?

4) What are the compatible crypters?

Any crypter and logger discount arrangement available?

H3xw3rk - March 21, 2017, 11:41 am

Vouch for Tom!

Really nice Project!!

vexa777 - March 21, 2017, 12:25 pm

Dvs75 - March 28, 2017, 9:45 pm

Very Nice program look like easy ! Keep it up Tom ;)

Organized Chaos - March 28, 2017, 11:59 pm

So far Tom Cruise hasn't disappointed me, and I never really expect him to. Thank you man, your software is top of the line. Dependable sellers are pretty rare these days and you're one of the best I've worked with. Stay awesome Tom Cruise?

BlackWire78 - March 29, 2017, 12:05 pm

Vouch for Tom! Always selling amazing products! :)

Katarina Du Couteau - March 29, 2017, 12:53 pm

Just like Silentbytes - vouch for Tom Cruise! Only the best ?

GhostintheShock - March 29, 2017, 11:04 pm

Vouched+ One of the best keyloggers on HF. I am very happy with his product. Tom is a great seller. GLWS..

sile1234 - March 29, 2017, 11:09 pm

Vouch for Tom! Very professional seller and a perfectly working tool! Thank you

rome1 - March 30, 2017, 5:09 am

It is FUD or not ?
I read different opinions..
Thanks

I prefer to discuss your Questions and Issues on Private message and or on Skype , This is a Sales Thread so I have sent you both a Private Message ?

HackYouBitch16 - March 30, 2017, 12:05 pm

Can you come online on Skype, I have responded to your PM and very surprised with your responses on PM. Need to understand what will happen to users who purchase the product with lifetime option and later on the project is owned by someone else.

albaba.logs - March 30, 2017, 12:40 pm

Can a web panel option be added anytime soon?

MICHAEL199 - March 30, 2017, 2:43 pm

I vouch for Tom this is one of the best loggers , I recommend this product to anyone looking for best and quality logger GLWS

Fortified Design - March 30, 2017, 2:48 pm

I have had the pleasure of using this product since it was released it's the most stable logger I have managed to purchase on this forum. I have purchased a total of 5 different loggers and this one seems to be the best slice out of all of them. The gui is simple logs are easy to read and have no issues with keeping clients with or without a crypter.

jesusuku - March 30, 2017, 4:24 pm

Just bought and easy setup with video tut, Vouch
Working perfect keylogger

blackgold2016 - March 30, 2017, 5:35 pm

this is a great HQ keylogger and it is one of the best i have ever used and also the customer support is excellent. i proudly vouch for the product.

B3Plays - March 30, 2017, 6:55 pm

Amazing Keylogger !!! Thank you !

Spaceables - April 4, 2017, 7:53 pm

So let me give you guys a little back story, I've never been into these types of programs. The other day someone told me me about this thread and told me how great it is. So I finally gave in and bought the program, I couldn't recommend this anymore. It's so easy to use and 'noob' friendly if your just getting into this. 10/10 would buy again

inyourmemory - April 4, 2017, 10:27 pm

nice keylogger bro! keep it up ! !

chikwadoca - April 4, 2017, 10:36 pm

Just purchased. Will post after i receive the product.

BruuDogg - April 23, 2017, 12:17 am

Question but is the "TrojanSpy:Win32/Skeeyah.A!rfn" come along with the download? Virus protection picked this up while downloading. Thanks

mancity - April 23, 2017, 2:21 am

After reading some good reviews i wanna buy

manning1983 - April 23, 2017, 9:46 am

I am new here... how do i get the klogger

Tom said he doesnt work with Venom Logger... How true is this?

BruuDogg - April 23, 2017, 11:41 am

If Tom said that to you I would be a bit concerned....Still wondering why my anti-virus picked up a TrojanSpy on this download Venom Logger. Could anyone shed some light on why a file like this would be a part of the download? The logger was downloaded from MEGAsync which I was not familiar with which was my falut in the first place but would like an answer and being new and all I son't want to shoot myself in the foot as a newbie.

someonenewagain - May 8, 2017, 1:38 pm

It's functioning for me via FTP. However, screenshots are NOT being captured properly and/or are not being transferred properly via FTP. I briefly spoke to Tom about this and he said for the

screenshots to function they much be sent via smtp. Which was a major bummer as I deployed this across several targets and the FTP dump of logs, sugar's, even jpg's are working great. It's just that none of the jpg's can be opened with any app.

I am giving it a 9/10 for that reason.

Very access to the programm and everything worked well!! Thanks Tom :D

theroc - June 28, 2017, 11:05 am

That one could tell me how to send the server (exe) once built. In the tutorial it does not send it but just moves it on its new desktop.

noob1337 - July 4, 2017, 12:51 am

So I bought my license the other day and of course was not able to do anything because Tom Cruise has not been online and it seems he has not been online since the 26/06/2017, at what point is it acceptable for me to file a charge-back and get my money back? I mean I am being patience as requested per his username tag that indicates he is "sick" but there is a point where I need my money back; I am guessing that based on other comments other people are having similar issues.

Was it really necessary to -3 rep me for my post? I mean you found time to come on and complain about my post about you not giving me my license (I would have taken the post down btw) but somehow managed to not give me my license again lol! Please understand I am really not a difficult customer but I bought your product specifically for a certain day which has now passed and

because you had a "autobuy" system.

Daverto - July 10, 2017, 7:36 pm

My friend bought it for me and it works quite good I bought most of his other products but this one I couldn't afford since I bought everything of his....

Also the price on this is fantastic make sure to buy this and his other products!

lord_moss - July 10, 2017, 9:59 pm

Vouch for Tom.

Well, what I can say after a few issues with my windows and virtual-box I manage to fully test the logger all I can say it's great, but something to be done, I am not saying it as a critic just as a guy which care about the privacy;

Things which I think they should be done:sensitive information is easily accessible, would be nice if you would implement something to encrypt the store information from application config and the password to be stored into the .exe somehow or something to make those hidden from users;

the screenshots should be removed after the file has been successfully sent out, as at this moment they become available under a different name.[sent.Screen_23_07_2017_04_59]

Code <RunOnlyIfNetworkAvailable>>false</RunOnlyIfNetworkAvailable> as I've read the task.xml is it this to run the logger or to send the email? I think it would be nice if you was leaving the user to tick this option as I would prefer it to be available and run only on a network this is just my opinion.

And as a logger of my dreams , when certain window has been opened and contain some specific words an email with a different subject to be sent out with a video or screenshot also the keystrokes;

By all mean, I am satisfied with the product as it is, the description by this time it is also what the software/tool really do.

My pleasure to vouch for you also do business with you!??????

gggmark1 - July 23, 2017, 5:14 pm

wow i have begin looking for logger for a while, and i have try so many but venom is different best keylogger out there to buy and excellent delivering in email setting ftp setting and web login... hurry and get yours to feel the magic of venom. Kudos to you Tom Cruise.
