Thread: [White Hat group...](#)

Kodaz - February 3, 2017, 1:20 pm

Hey guys.. So i was thinking about starting a white hat hacker group since theres not many out there and all the groups here are mostly black hat and full of illegal stuff. Anyways, Let me know what you think and if i decide to do it I'll be looking for leaders that can help out.

V3N0M - February 3, 2017, 1:25 pm

Forums in general are not the best place to look for serious replies and people.

Kodaz - February 3, 2017, 1:27 pm

Hahaha, Yeah I know I'm just looking for opinions and i thought this was a good place since the name of the forum is "Hack" Forums so this is the lounge of the "hackers"?

Bluffer - February 3, 2017, 1:28 pm

Just being honest, I don't know if you will find many white hats on here let alone any hackers.

I used to know this guy named "Aura" He helped me out back when I was starting... However, Seems like he changed his username, But anyways if there's more guys like him then definitely we should have some whitehats around.

Levi - February 3, 2017, 1:32 pm

Depends what you're interested in accomplishing as a group. Most of us just help out where we can.

Yep, Thanks to him I got into the so called world of "hacking".

V3N0M - February 3, 2017, 1:40 pm

They should rename the forum either Scamforum or E-whoreForum. Hacking topics are the smallest percentage. It is normal, you couldnt imagine a real hacker, white or black or grey or other colours of the rainbow, actually wasting time on forums :)

Larsenpower - February 3, 2017, 1:41 pm

I am very pro hacker please let me join please

But yeah you're right most won't spend time here... Wonder where then..?

Ofc there will be few here. As to my advice ? Well, mate, I think best way is first to become a good one and by itself you will get in such a circle. Other than that deep web has few forums that might have some good hackers. Ive actually known only one that is a real one. Also you can just post somewhere that you are looking for them, and you should check your email drafts, like me and find a message by someone that hacked your clearnet email and left you a message there. Which means he actually tracked you through TOR which is kind of an achievement by itself :)

Are you saying that happened to you or just imagination? About the email thing...

V3N0M - February 3, 2017, 1:48 pm

It did happen. Btw Instant hate from the wanna be hackers here... :D at least I dont pretend to be one.

So you're saying that somebody hacked you behind tor without giving them any information about you an accessed your private email?

All I said is that I wanted to discuss something with a real hacker or hacker group. Since then, I find the definition of internet security a bit funny really.

(Feb 3, 2017 02:50 PM)Kodaz Wrote: [\[CITE\]](#) So you're saying that somebody hacked you behind tor without giving them any information about you an accessed your private email?

TOR is stopping me from hacking you. Its not stopping actual hacker doing it.

hope you aint surprised, doesnt everyone know that, if someone really wants to find you he will?

It wasnt -3 rep till the moment I replied to this post, and said that the forum is close to useless. Which is again expected. I do not request from you to believe it. Its not some spooky story. Just trying to share some experience with you, and help you, that is only in your interest no? But yeah I have many gains from telling stories...just whatever, go buy a e-book on how to hack and create a group or whatever.

Royal Mint - February 3, 2017, 2:12 pm

Mate, I am the best hacker around, hit me up.

V3N0M - February 3, 2017, 2:13 pm

Update:Just saw its Mr.Robot that gave me the rep :D hahaha, a person well known for reasoning and logical thinking. Yeah spending 25\$ giving rep and getting rep back just because I gave someone, makes me much more reliable and all in all more "HACKER".

Kodaz - February 3, 2017, 2:13 pm

I'd never buy an e-book on how to hack that's a waste of money. I did not intend to make you mad just sharing my thoughts...

Only true to an extent but if you made an account using an alternative IP, username and email that is not used elsewhere, didn't share any bitcoin transactions with them nor did you have a previous account - they aren't going to find you.

You obviously made some in your eyes insignificant mistake with your OPsec.

Please read up as it seems I cannot identify how stupid of a mistake you have to make for this to happen.

Now you are just getting annoying. I even dont fullscreen so they dont know whats the size of my fucking display. I didnt share a fucking bit of info. I guess your obscure knowledge and mind do not posses the required information to comprehend that such thing is possible. No probs just learn to be humble, and not to push your real life complexes around.

few that I used to also configure the browser. And all in all my internet provider is with dynamic IP. But what dafuq do I know. Btw interesting discussion we are having, on the post that has nothing to do with it. Just accept what I said for a fairy story and extract information from the UBER users. HQ shit.

I wasn't ub3r for like 15 months+ chill the fuck out. Was at 2k+ rep and very well known before I got ub3r.

You can't just buy the upgrade, you are given approval first.

I had a previous account before this one... Which I lost access a while ago and reported the old account. It was back in 2014 when I first joined HF.
