xClain - February 5, 2017, 10:15 am

Not sure if it's just my stupidity, but please be more specific it seems like your just posting to get your post count higher, " Recommend Manually " how would this increase his chance of revenue if he were to follow everyone manually it would take ten times longer... unless you mean follow accounts related to his niche, however, the bot can do this .. if I misunderstood you I apologise in advance.

Using shared proxies increases the chance of your accounts getting banned quickly. I'd advise using dedicated proxies.

Yeah , definitely want dedicated proxies

EasyPeasy - February 19, 2017, 7:56 pm

Why? Shared proxies are only used by 3 others member!

Because having 1 proxy dedicated to 1 account is always a super high chance of not getting banned/flagged.

Those other IP's could get flagged or some shit which would also effect you indirectly.

Yup, its all about risk vs reward. For an extra like 70c per proxy I'd rather not risk getting banned as easily and losing hours of work

Ahah, lets hope it turns out well!

Lovely? - February 19, 2017, 10:33 pm

remember not to only use same domains on max 3 accounts to avoid them getting flagged.
