Thread: [Replace text in Excel file with VB](#)

K???er - February 4, 2017, 12:12 pm

I need to replace text in an Excel file that is in a textbox in VB. How can I do this? I have searched on Google about this, but can't find any simple solution. I hope there are some experienced programmers here that can help me with this. Thanks!

This can be done using NPOI (<https://www.nuget.org/packages/NPOI/>) in 0,04 seconds

Edited: i'm out of home now, but I used NPOI a lot. Use this snippet to get a idea:

<http://stackoverflow.com/questions/39034401/c-sharp-program-using-npoi-to-edit-cell-values-of-excel-xls-not-working>

'Give a man a fish, and you feed him for a day; teach a man to fish, and you feed him for life'

LOL ?

LOL ?

True, but if I see how he did it, I will know how it works, lol. I have no clue how to adjust all these small lines into 1 project.

I didn't have that NPOI that's why there's error.
I hope you can now understand it.

?
