Thread: [\[BUNDLE\] Pay \\$1.49 in BTC and get 12 steam games](#)

LePotato - February 5, 2017, 9:16 am

Hey there!

Daily indie games just released a bundle. I think with almost all their steam game bundles, if you pay the price in BTC, you get two bundles instead of paying on PayPal and receiving only one bundle. This is a good idea if you want to try and flip games for a small amount of profit. Anyways here it goes!

Enjoy <3

Edit: turns out they have a bunch more bundles on for offer :

These all accept BTC in return for twice the amount of games ?

Yeah, as long as people want to buy the games, it's some decent profit.

Yeah, if you read it, the deal was to get twice the amount of games with the same price by paying with btc ;)

Thanks man. Also, do they always have these kind of deals?

Yeah, usually. I've only just started to use this site, cuz I usually use Humble Bundle as all payments go towards charity but with these guys accepting BTC, it seemed pretty cool.

Edit: Dude! I just found out that they have a bunch of different bundles available that accept btc for 2 bundles. Check this shit out : http://dailyindiegame.com/content_main.html

I would rather just pay 1.60\$ through paypal to get the games instantly since bitcoin transactions have been so slow recently :(
