Thread: [Image Slideshow \(html,css,js \)](#)

dovlica - February 5, 2017, 10:07 am

Hello!

I need a responsive image slider for my site, that has an option to enlarge the image on click, and enter the full screen mode slider. If anyone has a tutorial or something that will help me to do that, i would be very thankfull.

Example: menucool.com/responsive-slider

As you can see from the example, normal slideshow, with Expand button that allows full screen slider.

Thanks!

umm it has a download script button what you talking about?
lol

Use this JQuery Plugin: <http://kenwheeler.github.io/slick/>

Has everything you need other than the expanding image. That could easily be coded in js/css.
