All of these traffic sites are easily accessible off of google search. They are very saturated so they are great for beginners however if you'd like to earn bigger bucks I suggest finding your own sites and methods.

[Pack 2](#)

I was not able to upload my own packs so credit too all of those who made those and gave it away to the community. Credit them not me. I made this most to cover the 2 most common things I see people talk about on this forum. If anyone has any feedback let me know through PM pr post below. Good luck too all.

You'd be surprised how many people are looking for any traffic here every day :) Also, nobody's gonna just give out better sources for free here. These should help the beginners to get started. ?

Thank you OP! This should be very helpful :)
