Thread: [\[Official Group\] Royalty Programming Sector](#)

Therm?l - February 6, 2017, 6:55 pm

Welcome to royalty's programming sector recruitment sector, where a few lucky members will have the chance to join the group as well as gain access to the private programming subforum, the way to get accepted is very simple, dazzle me with an application, or complete one of the following programming challenges below (I strongly prefer this option).

Requirements:

1. No unresolved scam reports
2. You must produce a final result yourself, you can work in a team but each individual must produce an original entry

Challenges:

#1:

Make a fully functioning discord bot, the list of features are at your discretion

#2:

Make a basic keylogger, once again, features are at your discretion

#3:

Create your own project

mvmt - February 6, 2017, 7:21 pm

hello i am applying again

my dad is friends with elon musk and he taught me how to code space ships, we can make rockets together and be the first group to go to the mars

Shoe - February 6, 2017, 7:22 pm

Going to post and come back to this later, if that's alright. Definitely interested, will be opting for the Discord bot in all likelihood. Is there a language restriction?

b?xxy - February 6, 2017, 7:23 pm

Guessing you want the source code for that discord bit huh?

Seems like your motives are elsewhere.

Therm?l - February 6, 2017, 7:43 pm

Set it up and you can just show me :)

I don't need the source for it if your worried about that.

discretion*

Good luck to all applicants! ?

Sakuto - February 9, 2017, 5:38 am

Can I apply just with my reputation and my post activity? Not really interested in your project, I've prove my skills much more with my activity.

vaiperboy - February 9, 2017, 10:32 pm

too lazy to boot to windows to run vs, so can i just make this discord bot to do 1 thing? only a js that will make msg animated ?

Tee Plow - February 11, 2017, 9:31 pm

hello

i would like to join your group

here is some of my projects

<https://hackforums.net/showthread.php?tid=5547490>

<https://hackforums.net/showthread.php?tid=5475097>

thanks

First project: a few lines translated from powershell. Nothing spectacular. Also patched on windows 10 latest version.

Second project: Display Tee Plow's lack of knowledge about crypters. Adding digital certs only show how you are not capable of refuelling a file properly.

Third:<https://gyazo.com/468d4d84294148a733d567ecfb7639e2> wtf register startup? it is registry, not register.

<https://gyazo.com/7747352e4717144829acfa5205ef90b4> I wouldn't trust anyone who is modding and spreading a hidden tear variant lmao.

Fourth: Probably dropping a command line miner. Doubt TP knows how to create a mining engine by himself.

TP also showed that he is not capable of reading the OP.

ThatOneManInBlack - February 11, 2017, 11:42 pm

Well Gonna first try and Dazzle you!

so well here it is

Now here is some backstory

I was doing a school project and I had to make a program and well I Created a chatting program! ! It has emoji's to bots all the way to blocking users and a PDO database! . Here is some pics

<https://gyazo.com/a9ac16c1159fb9f6f47e134baade407e>

<https://gyazo.com/17afded1b16b7ce7a788c95688a1c4ed>

<https://gyazo.com/e9acbc0c321d6ceda97b5008dac6c6b9>

<https://gyazo.com/2b19099e069fd2ff5efc2cabc1e1fdb5>

the font and font color is customize able

Its still being worked on but if you want another project

(I have a website too)

just tell me ;)

TP also showed that he is not capable of reading the OP.1- it's not patched in windows 10 u can test before u talk shit

2- it's just a tool to help refudding files and i can teach how to crypt a file

<https://hackforums.net/showthread.php?tid=5536625>

3- it's just a mistake in writing caz i use a french windows and also english is not my native language

4- i don't spread any ransomware it's just to see how it's working for more knowledge

4- well everyone uses wolf's engine so please u can shut the fuck up , u can show me your mining engine master

haters gonna hate !

I truly lol'd at this.

1. Windows 10 latest version, not whatever trashy version you are on.

2. That is not gonna remove any proper detection.

3. "i don't spread any ransomware it's just to see how it's working for more knowledge"

WTF it just use FileFindFirstFile and FileFindNextFile and then encrypt it????

4. Yes and that's why it is disturbing, skids like you not realizing how AVs FUCKING MARKED WOLF'S ENGINE AS PUP!!!!!! AVs ARENT DIMWITS!

1- well who cares not everyone uses win 10 and i'm sure it's not patched in the latest version

2- who said it gonna remove proper detection ?
3- so ?
4- i have a FUD Wolf Engine so u can shut the fuck up
5- u are talking like u have a fucking pro , what u have made here ?
i don't see anything just bla bla bla and a crypter who never been released
i won't replay to you caz i'm just wasting my time

Codefuser - February 12, 2017, 8:40 pm

1. Nice excuse loser. Stop copy pasting.

2. (Dec 19, 2016 07:21 AM)Tee Plow Wrote: [\[CITE\]](#) this will make your file bypass some AV's
You did

3. Someone who is into ransomware should be arrested. Botnets do not destroy people's data, ransomware does.

4. Nice meme.

5. My crypter got released, and the FUD time was very long.

<https://hackforums.net/showthread.php?tid=5481772>

The only small issue was Fade not being able to support customers.

problems.x - February 14, 2017, 12:03 am

Its a cool grop guys aply now

VmX5 - February 18, 2017, 7:44 pm

My Name is VmX5, I want to join Royalty and specifically the programming sector because I believe I can contribute to the group and learn with the other programmers in the group.

Some things I've made :

[Project Imext](#)
[Captcha System with GDI+](#)
[dotNet Color Dialog](#)
[MultiMonitor Tool](#)
[BitDefender Theme](#)
[Bootstrap Alerts](#)
[Windows 8 Theme](#)
[Flatish Theme](#)
[Circular Progressbar](#)

Other Comments *

- Project Imext was a project I developed used to convert text into a RGB Color code then into a pixel meaning I could convert a entire paragraph into a image.

- MultiMonitor is a tool used to create a wallpaper for people who have multiple monitors.

Other Skills/and things:

Vb.net

PHP

I have 0 neg rep
Have never had a scam report
Arduino Knowledge
Made a few robots (Nothing super huge, just arms and some bipeds)

If this isn't enough I'd be glad to work on a keylogger :)

saliva - *February 20, 2017, 8:25 pm*

I've PMed you about this but I've received no response.
