If anybody got other sites, feel free to PM me.

Requirements:

- Need 5-20K BTC from that site
- NO ID verification (I got major trust issues sending my ID online)
- No foreign sites, because I'm using a Dutch bank

What is your question?

I seriously doubt if it's part of "Financial fraud", so I send a PM to: Minimalist.

I will update my thread once I'm sure. I don't want to risk my account over 1 question.

Minimalist told me that it's okay to ask, so I edited my OT.

Please read it, thanks for your offer to help anyway. ?

Extra info:

- I won't discuss this question any further, just a "yes" or a "no" please.
- I contacted Minimalist, it's okay to ask this
- I will not buy BTC from HF users with this Dutch bank account

I'm looking for a European site or Dutch site, where I can buy BTC with bank without verification. ?

Bittonic nl. - <https://bitonic.nl/en/>

I heard of sites like:

Coinbase.com

Localbitcoin.com

etc.

But I am asking where I can buy BTC with bank without verification (ID).

If you can tell me a site where I can do this, I'd appreciate it. ?

You buy BTC with iDeal there, not "bank" right?

You buy BTC with iDeal there, not "bank" right?You can buy with Ideal or bank directly it's up to you. No ID needed first purchase takes 24hr's to arrive all you need is text message verification that's it. There isn't too many options for bank unfortunately but it's the best option for btc 100%.

Okay thank you.

So when I use www.bitonic.nl (same site where I sell my BTC at), I can buy BTC (5-20K) with my bank without sending my ID or are there certain limits?

I will edit my thread to make this more clear :)

I will edit my thread to make this more clear :)You can order 15 bitcoins at a time without ID. (I think) Never tried personally most I ordered was 600EUR of that site without ID. But I don't see what the difference would be between any amount. They should all be able to be done without ID. :)

€600 isn't even close to what I need, but it's a begin.

Thank you so much for the reply, I never knew that the site I was using for a long while was doing this without a hassle.

Questions' been answered, thank you.

For those who got "other ideas" (sites/platforms), feel free to PM me. ?
