Go look in the marketplace. There are many people selling multiple crackers

It is always possible to hack an account using phishing. This is however not allowed to be discussed on here.

Quote:Phishing

This was removed from topics on HF a very long time ago. This includes posting phishing tutorials, questions on creating phishing pages, and just about any discussion on the topic. We don't feel this topic adds any value to our community nor does it assist members in becoming better hackers.

But, you could look on some tutorials on Kali Linux. It's a good OS to do cracking.

Social Engineering is also a way of getting access to someone's account.

Without crackers, your only option would be Social Engineering.

oh, i'm sorry, i don't know about that...
okay i'll try kali linux and social engineering...
need someone to teach me maybe...
