If link goes down again please notice me to reupload.

There is no password at rar file.

If you are the owner of any of the source codes and want it removed pm me.

Gonna check all files myself and remove all .exe and reupload but i am kinda sure there are not viruses there just source codes and you cant be infected from them.

It has example of codes for injections/encryption methods/process protection etc ..

Yes, I know. You got a warning before, but I told the staff your download is clean, so he removed it.
:)

Btw some executables are still exists (in .zip/rar files), but aren't harmful.

Just takes me to file dropper???

VisualSoft - March 4, 2017, 2:28 am

OP what happened with your rep?

Hopsin - March 4, 2017, 6:06 am

I am so fascinated that my old free crypter is there Insanity Crypter v1.9.6 Source Code

Please note that only basic functions are available in the current source and it was published by me long time ago.

Have a nice day!

caiveman - March 4, 2017, 6:08 am

link is down op pls reupload

TigeyGoesMew - March 4, 2017, 7:11 am

Yep, links down OP if ya could reupload i would appreciate that.

Please update link, thanks!

BadByte - June 11, 2017, 2:25 pm

@TheHackerLurker: look on github.***malwares/Crypter

Electron - June 12, 2017, 5:49 am

Tbh, those were published many times in forum. At least I saw them a few times

dithmo - June 21, 2017, 8:10 am

Thats a hell of a list, quite interested in learning to write a crypter so these should be useful, thanks

V3xD - February 16, 2019, 2:38 pm

Ripped directly from github, they are all source files.
