Thread: [\[WEBSITE SECURITY\] Cheap Web Vulnerability Reports!](#)

MODERN - February 10, 2017, 12:03 am

\$5 per Report.

FAQ:

Spoiler [\(Click to View\)](#)

How are generating these reports?

All reports are provided via WebCruiser Web Vulnerability Scanner 3.5.4 Enterprise Edition. (<http://www.janusec.com/>)

Acunetix Web Vulnerability Scanner will be used also if the above comes up with zero results. (<http://www.acunetix.com/vulnerability-scanner/>)

Will you help me fix the vulnerabilities found?

No, you are only buying the report.

Why are you charging for this when you can use tools found on linux distros such as Kali?

Because there may be people out there that either #1 Do not know how to use those tools. #2 Too lazy. or #3 Just want a nice clean report.

What do reports look like?

Vouch Copies: 0/2

Evanescence - February 10, 2017, 3:49 am

I'll take one of the two vouch copies available.
