Thread: [Help \[Ip changed\]](#) [\[RAT\]](#)

urbandesi - February 10, 2017, 5:56 am

My IPv4 Address has changed it means i lost my victims? Public IP is same.

bzr? - February 10, 2017, 6:09 am

Not unless that's your VPN IPv4, in which case just update it on the port manager panel and you'll be back in no time, if it's not then you should be fine, but you might need to update the ports via the router.

Purple Kief - February 10, 2017, 6:09 am

No, it means your port is closed.

Your clients are all there, being blocked by the closed port.

Just open the gates, no reason to keep them all waiting.

urbandesi - February 10, 2017, 6:11 am

Thanks alot brothers, thank you i opened the ports now

ThisBoss - February 10, 2017, 9:47 am

Buy some cheapest domain to make your own DNS and never lost victim for IP address changed.

He isnt talking about the public IP, hes talking about IPv4, the 192.168.x.xx thingy you put in your router settings to open a port

branb1206 - February 10, 2017, 4:14 pm

yeh same everyone elses comments should fix it

Autist - February 10, 2017, 8:27 pm

You should be using a DNS idk why you are not

urbandesi - February 10, 2017, 11:12 pm

Problem solved thanks to all #peace
