Thread: [Installing TOR Browser on Kali Linux](#)

UrLocalNewbie - February 10, 2017, 7:28 am

i've searched for this on google/HF and also tor's official website, im not sure if there's something wrong with the machine itself, i'm currently running Kali Linux on a virtual machine, if anyone can help me with it through tv i'd be grateful

Thanks for reading :)

quirky - February 10, 2017, 9:13 am

you either troll us, or didn't even bothered to search on google

UrLocalNewbie - February 10, 2017, 9:47 am

i searched and i actually am still searching, still no luck

Toby Flenderson - February 10, 2017, 9:52 am

are you trying to just get the browser or run your connection through tor?

i'm trying to get the browser

Toby Flenderson - February 10, 2017, 9:59 am

go to the website and dl it then lol or through cmd

mezinec - February 10, 2017, 10:41 am

just download and run `./start-tor-browser.sh`

Jokers_Domains - February 18, 2017, 6:16 am

Just go on YouTube and search for SSTec Tutorials then search his videos for installing tor on kali, it works awesome :)

vaiperboy - February 24, 2017, 7:10 am

amount of idiots on this thread....

just do 'apt-get install tor'

then wait for it to install then do 'tor' n it'll open the browser up :c

Malicious Intent - February 24, 2017, 7:14 am

apt-get install tor && apt-get install vidalia

vidalia is gui for tor.. the same one you windows users used to .

quirky - February 24, 2017, 8:43 am

he PM'd me 2 weeks ago, i gave him a link, the he told me he solved. not sure if he's arround anymore :)

Thx for restoring my faith in the Kali Community here on HF... ?

By the way: When u try to download something in Kali. Using CMD Commands wont get u anywhere. ? ??

tor service and tor browser different installs

after install both you need to edit some settings files for open browser just google it everytime I find the right tutorials in that site.
