Thread: [Exterbyte Crypter + Luminosity Link = Problem](#)

nistokou - February 10, 2017, 7:33 am

Hello HF !!!

I have a little problem when I crypte my file,
I lose my clients all options on LL are on

Thanks to help me

Regards,

Regards,

When you crypting your file with any crypter most RAT features probably will not work.
I cant help you since i dont know why you lost your clients , probably your file was not fud.

Codefuser - February 10, 2017, 8:16 am

Get a proper crypter, thank you.

Exterbyte's DLL is detected and is probably getting killed by AVs.

XSSPLOIT - February 10, 2017, 8:19 am

"Thanks to help"

KeK'd.

Using exeterbyte is a meme, not even rt fud

KING - February 10, 2017, 9:16 am

Some clowns like Codefuser are biggest retarded of this era so ignore people like him. Just spreading bullshit nothing else. [We're bypassing all major AV's without any problem. If any ExterByte user has any runtime issue. Contact our support we will check.]

Anyways Instead of making thread here. Why didn't you got in touch with our support via Skype to help you? Soon we'll make videos to make it more easy for our customers.

Use these settings on crypter:

1. Use Persistence both Process and Startup.
2. Use Automatic injection method.
3. Use custom icon.
4. You can also select any other option you would like to use.

Note: Make sure to disable all installation/startup settings on your rat otherwise you won't be able to crypt your file. If you face any issue just get in touch with our support through Skype.

Yes, It's better to contact our support so they can help you even better. ? ?

Sleek. - February 10, 2017, 10:12 am

I keep seeing exterbyte shit on LF and honestly i doubt that it's not detected.

Then again, it's a \$11 crypter

You have doubts? Okay, You can test. There are only 2-3 people who's are on mission to spread bullshit against ExterByte Crypter. And this guy "Codefuser" is also one of them. ?

Providing a quality crypter at low price is my main goal. If I wanted I could have sell it at \$30 per month too. Don't judge a book by it's cover.

I am not against Exterbyte. I am against shitty crypters.

The fact that you cannot create a proper USG and have to use SFX to barely be FUD for 2 hours tell something.

For those who still have faith in Exterbyte:

Fresh scan of a newly generated DLL:

<https://www.virustotal.com/en/file/2cae00efd177297d39f8a9d84f9062a58062f93a73c9b2958f76cbc5f882fd98/analysis/1486795568/>

This is why your shit is getting killed left and right by AVs.
