Saw this product the other day, you must have bought rights? ;P

Looks like a cool little tool as well :)

But in short, not even 5 people entered. So it was not worth it to do the giveaway.

But since there was like 4-5 people who did enter I might give one of them a month package. Will see.I have deleted my post.

I did not buy rights, I have experience in this field and the guy who was selling this is friend of mine. He was running the thread until I got everything sorted out and was ready to launch this thread. We are selling this together ? He is the programmer.

**Shoelaces** - February 11, 2017, 7:36 am

Purchased this yesterday :)

Can confirm arbitrage betting is a real thing and their program is legit.

Never seen such tool that gets you BTC matches so easily.

Made 3 bets already on 4% games. Gonna make me guaranteed money when the games just end. Will earn about 30\$ when the games end, then make more bets :)

Helpful support, didn't know anything about how their thing works but its simple.

This sounds a little misleading, your product title is Risk Free but then you say dont go crazy with bets in case you lose, meaning there is a form of risk. I'm posting however to come back to this, I believe I understand what this is doing and would be interested in trying it out.

How much would you need to bet with in order to get the \$30 back from a weekly subscription?

Hey I actually tried the product and I am statisfied with it. A problem could be that some websites don't appreciate you arbitrage betting and could remove your bets when they think you are doing that.

However they will only do this when you bet a lot on those websites and one website it particular, the rest is less aggressive.

That is probably what is meant with don't go crazy because there have been cases in the past of people doing this everyday with thousands of dollars worth of bitcoin and getting their bets removed by the website(s).

To get the 30\$ back I would start with a 200\$ investment, and just do a couple bets with 5% profit. You have enough time for this if you have the week subscription plus you can do some extra bets to actually get profit.

I can understand this works, I just didn't understand how its risk free but you can still lose money is all. How much are you putting on each game and how much have you earned from your bets? Could you give me an example match you placed your bets on, I only need the amounts, not what the game was.

How much are you putting on each game and how much have you earned from your bets? Could you give me an example match you placed your bets on, I only need the amounts, not what the game was. It is risk free.

As an example:

There is a game that our program scraped and the return is 4.2%  
It tells you to put over/under bet on 2 different sites.

My total investment is 100\$ for this.

Our program tells you to put 56.51% on Over 3 for example and for Under 3 it tells you to put 43.39% <- These are just numbers from my mind.

So I put 56.51% of 100\$ to Over 3 and 43.39% of 100\$ to Under 3.  
When the game is finished you have made 4.20\$ profit guaranteed from just that one single game.

For more information feel free to ask me.

The key is to reinvest your amount that you won all the time to maximize profits.

It is risk free as long as you don't get cocky while betting.

I am putting about 200\$ on each game. Today I had a match with odds on one side of 1.53 and on the other side 3.85.

So I betted 143 on the 1.53 one and 57 on the 3.85 one, you can calculate what my profit was.

You can split it between couple games. Never get cocky and bet crazy on single sports game.

I have received vouch copy of this product.

Thanks for OP for giving me this product to review.

Me personally I have never heard of arbitrage betting or how it works and I was quite worried first like will this work but OP explained a lot to me and I did some own research and after all its just a simple thing. Taking advantage of these betting sites.

I found out too that there is other arbitrage program sellers online but all of them were so much expensive than this one, and I couldn't find any service that offered this with Bitcoins. The program OP offers is so much safer and its easier profits & faster.

I got vouch copy like 2 days ago and I was ready to invest money into this as I promised to OP. To be honest I started with only 50\$ because as I said i was not familiar with this so I wanted to try it out first to see if it really works.

I have done about 5 games per day average, and for example today I got bet on two games that were both 5% return.

The day I started I put 50\$ total to game which was 3% return. I won it and got 1.50\$. It may not seem that much, but believe me it is a lot if you just keep betting. I was at 51.50\$ that point and just kept betting it to these 2-3% matches and within the same day I got vouch copy I was at around 60\$. Yesterday I only bet on 3 matches cause was quite busy, managed to go about 65\$ and today with that 65\$ I managed to go to 80\$. Bet a lot today.

The program on dropbox is simple to use and read, believe me. This is not rocket-science.

30\$ profit (guaranteed) in couple days is awesome. Can vouch for this service.  
OP offered me a discounted copy of the monthly package so I decided to go with it.

I received a vouch copy from Satoshi Signals, Oliver's partner. I can say this works and is efficient, however I only managed to place one bet (even after making new accounts on different IP's and such) on the site that's notorious for being anti-arb betting. Not a big problem as there are lots of other sites you can bet on, but it is a little disappointing as a lot of good arbs are on that particular site. Anyways, I definitely recommend this because you can make your money back really easily. I will be purchasing this in the near future.

Thres no risk free betting even if its arbitrage

Imagine if you bet arbitrage on 2 different sites and the other booker cancels the bet, this is pretty common.

That is really unlikely that it would happen. Also we scrape couple sites where there is no chance for them to cancel your bet.

We will give you a page that we wrote that has ton of information once you purchase that these kind of things can be easily avoidable.

= Risk-free.

More than welcome to give you more information.

Our program is risk-free and the bets it scrapes. But if you fail somehow it will be your fault, not our program.

Better investment than eBooks/useless programs.

This one actually works and I'm quite close to making my money back from the weekly package. Really profitable and actually WORKS!

Feedback: - Price is great, no complaints- Support answers fast and actually cares (unlike other sellers)- Program actually works and can make you money- Etc.

Surprised that this actually works ?

I was skeptical about this at first because I have personally never done betting in sports or any type of arbitrage.

Decided to purchase yesterday and I have already done couple bets.

12\$ exactly on profit but after couple days more I will have a lot more money and can confirm this is profitable method and also no risk of losing once you place bets!

Oliver is really helping me! When I was placing my first bets I was quite not sure but Oliver confirmed it all for me and got my first bets in and won it like couple hours later.

Good program!

I was skeptical about this at first because i have personally never done betting in sports or any type of arbitrage.  
decided to purchase yesterday and i have already done couple bets.  
12\$ exactly on profit but after couple days more I will have a lot more money and can confirm this is profitable method and also no risk of losing once you place bets!

Oliver is really helping me! When i was placing my first bets i was quite not sure but oliver confirmed it all for me and got my first bets in and won it like couple hours later.

Good program!Glad that you liked our product :) Really nice that every customer so far has liked the product, have not heard negative feedback. Great!

Available for support and sales.

Look into arbitrage betting, you'll understand. You're basically betting on both sides but you'll still profit doing so

**sourdiesel87** - February 16, 2017, 8:44 am

3-5% is pretty small especially if we are betting low amounts. How often do those 20%+ games come by? Once a day? Once a week? Can you post your profit/loss for yesterday so we can get an idea of how much can be won or the chances of losses?

Notice our program scrapes 40-60 games a day for average.

20+% games. Can't say really how often they come, but I'd say once in 2-3 days. 20%+ games are pretty rare, but happens sometimes.

Less than 15% games should be once or more per day :)

This is constant guaranteed profit, and 3-5% is not small. Since its only per game.

There is no LOSS on our program. So I can't post "profit/loss" for yesterday.  
I did not do any bets yesterday due to not having time.

But I saw four 8-15% games yesterday. Just had no time to bet.  
However heard some customers placed bets on 13% games yesterday.

Sent you a Pm anyways.

Yeah that's true actually if I do bet on lets say 20+ games a day at 3% that does add up. So these bitcoin sites, can we deposit btc and play right away or do they wait for confirmations? If they are 0 confirmation that is awesome. And they let you withdraw without ID or any sort of ridiculous verification like other btc casino sites?

Some of these bitcoin sites require 1 confirmation or so but you can just add BTC there and whenever you want you can withdraw if you don't wanna have money on the site anymore. Easy as that.

These sites do not have ID verifications or any other system :)

The sites our program scrapes.. All these sites are easy to register, easy to deposit.. easy withdraws.. Secure. Easy to use.

You shouldn't have to worry about confirmations. It's easy to scam if they accepted 0 confirmations. At most it takes an hour on a slow day

Just checked the program and it had these matches right now

4-6% returns What does the 5,275-->3.696 arrow mean?

And by the way, 3-5% is huge, I do not know much of arbitrage betting but I do know, if you invest your money in a stock for example, you usually get 10% PER ANNO if its a good year and you still have the risk of losing your money or at least a part of it so 3-5% per game is pretty nice compared to that.

In your thread you said that THERE IS the possibility of losing your money. How? Like, if I understand correctly, you just click on both links in the sheet and bet on both sites and on one site you WILL make profit, because its either possibility A or B, right? Next questions is: How much do you bet? If I have 500\$, one game, do I bet 250\$ on possibility A and 250\$ on possibility B? Or do I split it elsewhise?

Regards

RegardsGood question. Too bad I haven't answered this yet.

Basically 5,275-->3.696 on sheet means:

5.275% is the highest return you will get from that game, like in best case.

In worst case, you will only get 3.695% return. Simple as that.

But still guaranteed profit.

Yes this is a good opinion to invest your money to compared to stocks :)

There is some possibilities of losing your money, but those chances are really low. And our program has no risk. All the tips it scrapes are guaranteed profit and can't be "lost"

You could lose money if:

- You bet too much on a single GAME (Betting sites could suspect you betting high and in worst case ban you)
  - > Easily avoidable. Just don't be greedy and don't place too much on a single game. Just split the amount between couple games to be safe.
- Bet site cancels your bet for whatever reason (Highly unlikely)
  - > Can be easily avoidable too. If for some reason they would cancel your bet/not accept it it you could "save" the money and only lose max 1-5% of your money. We tell you how to avoid this.
- Betting site "bans" you and you can't place any bets
  - > They can do this if they suspect you're doing arbitrage betting. This is easily avoidable too. We will give you our site that provides a lot of information regarding this and how to avoid everything that would lose you money.
- You not double checking everything
  - > Means that you see the game on our program, you see the odds and you go place a bet on the sites given. Before you place a bet you don't refresh the program and see if the arb is still available/odds did not change.

Easily, easily avoidable.

But. We've gotten a lot of positive feedback since we launched.

We have many customers and no one has lost their money expect one case where user did not double check odds/refresh our program. This was his own "stupidity".

Also your last question. If you have 500\$ to invest (or any amount) our program tells you how much of your investment you will put on X site (tells you the percentage) and then you place 40.293% (for example) of your investment to the given site. Easy as that. We will help you.

Also its better to split that 500\$ between many games instead of betting 500\$ to single match. You can read above what I told, this is a risk betting too much.

More than happy to answer your other questions :)

I sell it because this takes some time to look for the bets and "snipe" best ones. I also have not that much money to invest on this. I have other sources of income than this and I actually invest in other things.

Just a note about the 10%+, it's likely that any disparity that high is an error by the bookie and you're very likely to get fucked if it cancels. Anything 10 or below is generally safe.

I have bet on 20+ 10% matches so far, haven't got fucked up once.

Yesterday couple customers did bets on 13% too.

Games under 10% are just a bit safer. No huge difference.

Bets:

Spoiler [\(Click to View\)](#)

This is same match. Odds changed a little bit on powerbet so my returns are a bit "worse" for the second match.

In best case I will be getting 151\$ and if I have really have bad luck (less than 5% chance) I will be getting about 115\$.

Still gonna make profit no matter the outcome, you can do the math!

Also my investment was about 100\$ - couple dollars less

It was easy and the same offer has been there for close to 30 minutes so I even had time to deposit BTC and wait for confirmations.

Easy profit :) I can guarantee guys this will be the best product you will ever buy from HF. Better investment than those eBooks.

There was about 3-5 of 40-50% return's today and there STILL is.  
Imagine the profit.

~ Also more than happy to provide proof of all this live on screenshare if you want to!

Also: Today earlier we had 100-150% return matches. Yes 150% return on your investment. That's amazing :)

SwordofJustice - bro i don't want to be rude here but it seems that you never tried the service. and if you did than you did not try all the other "tips" services out there on hf etc.

I tried them all. lost a lot of money in this journey. When i first found Oliver I joined his regular tips group which was above average but I did not like it.

1 week ago I joined his arbitrage group and made some nice profit already. that's right the earnings are low 4-10%. most of the best I took were 10%.

That's right powerbet is involved in most of them, but hey i bet 20 times already and they never banned me..also i am keeping only the needed money for 1-2 bets on powerbet if they decide to close my account without refunds - fuck them. but hey they didn't! and i don't think they will.

I did see 20-60% odds also but i never took those. I am doing 4-5 bets a day, 4-10% with around 600-1000mbtc and i'm happy.

so

NO this is not a scam

NO this is not a shitty betting group

NO I am not affiliated with Oliver, i even critisized his GUI for the html file and

YES this is probably the best betting group you will ever see

YES you should join now just to try and see who's right

YES vouch for this guy and his partner

Update from my latest post..

Everything is going fine :) Have profited a lot. Profits are not 100\$/day but this is stable profit and almost risk-free. And I have not got banned on any sites yet because I play safe.

Also oliver if you could help me with this one arb, i have a question. hit you up on discord!

I have received great help and support from Oliver and can vouch for the product itself too.

I don't have thousands to invest on this but even small amounts can get you a good stable profit.

I have profited around 70\$ in 5 days only betting quite small. This is not 100\$/day method or BS crappy method, this actually works and can you get in decent money.

I mean 70\$ in only 5 days is good for me, since I did not invest crazy amounts and this is like no chance to lose.

Will most likely renew my subscription in 2 days Good product ?

Big vouch for Oliver Products

I have been using the 1 week package for couple days now and decided to post you guys my opinion on this product!! :) )

i personally have no experience on arbitrage (before) but it was pretty easy after first day of purchase i understood almost everything.. :P seems hard but it isn't.

i started with 100\$ investment in Bitcoin and i managed to get some high % games! a lot of the sites include powerbet (OP told its really aggressive and watch out for it) but its working no problem for me and i have not got limits or anything.

i have profited about 50\$ but i will try to make more... money back already in 2 days.. 50 \$ = 2 days. good deal to me. will continue using this with help of Oliver Products! ?

Also i dont invest that much time to this per day.. only little amount per day to make some good and easy \$!

Support is really fast and i actually get help when i need so that's a big plus!

Picture of my withdraw:

Cool :) will deposit to other sites later today and I aim to make a lot more profit before my subscription ends!

This was my honest review! i did not get paid for this, i paid the package and also paid the full-price. I like the product!

**Ogboss37** - February 22, 2017, 10:15 am

Been a customer for just over a week and have only just figured out how to use HTML file, this is partially my fault as communication between myself and Oliver was difficult.

We've spoken today and we've come to the conclusion I'm going to really struggle to profit from this, neither of us were aware of how strict BTC gambling laws were here, I'm unable to sign up to most of the sites used due to my country, the United Kingdom. :(

Waiting for a resolution from Oliver.

**Bulma** - February 22, 2017, 2:07 pm

looks nice product ;)

Have some questions.

Let's say I have \$100 to invest and you said each day you provide 20-40 games/bets.  
Are the games distributed/running in whole day or in few hours? I mean, if I bet \$100 on one game, I win let's say \$4 so in total I have \$104,so in the same day I bet \$104 and so on and so on for like 30 games a day. is it possible?

hope you understand the question ;)

In other words, could I bet \$100 and reinvest profits let's say 5 or 10 times a day and make anywhere from \$20 to \$40 ? (one bet 4% ROI,  $100\$ - 4\%ROI = \$4$  profits.  $10 \text{ games/bets} = \$4 \times 10 = \$40/\text{day}$

My Honest Review

- Its already been 2 - 3 day i guess since i subscribe this service. There are a lot opportunity every minute ranging from 0.01% to 17% ( i saw the highest 272% yesterday but it in couple minute it already gone) so i dont even worry about it but we as player need to fast to bet like put some btc first at the site.

Another thing that i like about is The LIST update super fast using dropbox ( I install dropbox software and it will open page at my chrome and then i install Easy Auto Refresh addon and set 15

second for auto refresh) i managed to bet 5% and 10% but my mistake is the date of match is too long as i too excited, ineed to wait so i will might subscribe for other week and try create a strategies by target 5% every day.

Overall, i think this so good service and easy to make profit. Seriously its too easy to get profit but with proper strategy if i want make profit everyday like "bet on next day" but if the percentage higher and the date is next week, i still bet on that match. Depend on our strategy?

My Suggestion to Oliver Products & Satoshisignals

1. Can you make it 1 week subscription to 2 Week as there are a lot of good match is on weekend, it easier to other people get ROI and i can continue to subscribe your service ?
2. Can you put other sport besides football.

Hmm - its hard to do many games per day if you have 100\$ to investment. Many games are hard to do per day (10+) because arbs get removed if odds change, and some of the games start within later today or next day or so. So you would have to wait for game to end to get money.

If you reinvest everything you make - you can expect a good amount to be made.

If you want more detailed answer, please hit me up. hope you understood.

Quote:Our average return per game is 3-6%.

If you want to be earning \$50, you need to be betting like \$1,000.

If you get lucky and a 15% game comes up, you'd need ~\$335 to earn \$50 for that game.

Yeah I understand it but how risky is to bet \$1,000 or more?

Is it possible to spread to many games or accounts to be out of risk range. ?

Its completely random how many arbs there will be - but the file updates within every seconds and there is always arbs.

You can easily bet on higher matches than 4% such as 10-15%.

I dont recommend betting 1 btc per match, just to be safe.

Its better to split your money within many games than one match.

I understand all the above. I'm just trying to get an idea of what realistically this can be scaled up to. So,

1. Is it possible to get an average of 4%+ per match?
2. Is it possible to bet 1 BTC per match without banning issues?
3. Is it possible to get 40+ arb bets like the above per day?

Mate, Oliver clearly wrote that it's best to bet max \$100-\$150 on game to be safe, 1BTC is way too much...

Also, it's clearly written that ROI is 3-5% always, sometimes even 10% and more.

And it's clearly stated that we getting 30-60 arb bets per day.

He didn't clearly state that 1 BTC was too much to risk banning. He said to "be safe" which could mean to avoid drawdowns. If you are splitting that up into smaller bets with the same bookie, the risk of banning is the same.

So again, is a 1 BTC per bet put you at risk for a bookie ban? What amounts have people tried that did and didn't result in a ban?

The official profit limit per bet is 15 BTC and 50 BTC per week with Powerbet. That doesn't mean they won't ban you anyway for lower amounts.

New to arbitrage betting.  
Is this good for newbies?  
What is the max amount you can bet that will guarantee you a return?  
What is the amount viable to be invested to get a profit?  
How often can I do this per day? It says you have 40-60 matches are those all guaranteed win and profit or not?

Hi, I bought this method 3 days ago, and I have to say that it's a really suck method.

So I lost in total about to 90\$ (30\$ for this method and 60\$ in betting).

I put 60\$ in some betting site and 40\$ in other to earn about to 5%, but suddenly I got a message from the site that they canceled my bet, so I didn't know what to do, one bet is online and I even don't know which teams play and I understood that maybe I'll lose my money...

So, eventually I lost from this bet 60\$ + the 30\$ I paid...

Highly recommend DON'T BUY IT, it's a big risk and the profit isn't sure and doesn't worth it.

1/10

And of course the seller doesn't even agree to refund me my money...

How often betting sites cancel games?

Can Oliver comment on this I can comment on this yes. The amount 60\$ he lost could've been a lot lower loss if he would've read my guide and bet on other outcome after it got cancelled to minimize losses.

Or he could've bet on the same site where he was able to bet.. on there he would've put bet on other outcome to minimize losses to 0 \$ or only couple dollars but he didn't.

I have heard 3-4 people their betting get cancelled from 65+ customers.

Its rare.

Its rare. First of all, I thought to do it, but for some reason all the opposites bets disappeared.

I read your guide and wasn't there nothing about what to do in situation like this.

And I did not understand at all what they canceled me twice my bet and eventually they have also blocked my user.

In addition to that, I sent messages to some users who purchased the method and asked them if they earned something from this method and the answer I got was:

"I'm not allowed to tell you the truth, I'm sorry. All I can say is good luck."

So I'm posting my experience with this, I believe I still have like another week or two, but 2 weeks is plenty of time.

So does this work? YES

This product is everything that is advertised, the words aren't twisted in a way to make it sound like an earning method, it is an earning method.

Will I continue? No

Let me say this again, this DOES WORK, but I personally cannot profit enough from this to earn my money back + have profit. You're linked a web page inside a Dropbox folder which generates bets for you to bet on every couple seconds. By that I mean it's updated by the second, it won't necessarily give you and new bets. So yes, this is automatic, OP isn't updating it himself, it's being published on its own.

Now, the reasoning I don't see myself profiting is most of the time that I've seen bets that promise a 5% return, they're about 2-3 days away most of the time, rarely I ever find it same day or next day.

From that, I don't have hundreds to spend, so I put everything I have into those two bets and then I have to wait those 2 days to get profit. Recently I was hit with a cancelled bet, after this I nearly lost 69mBTC(~\$87 atm), luckily, a couple hours later they brought back the same results and I simply bet again, if I was asleep and this happened, I would have lost a majority of my money. This one site is also one of the most popular sites that the arb results come from, and after this incident, I'm not risking another big bet again. OP has a guide on how to lower your risk on this site, I'm not sure how well it works and I personally don't want to be testing this.

In the space of a week, I only earned 7mBTC, and I paid ~\$60 to be in here for a month, at this rate I won't be profiting at all, but probably get close to breaking even. Most bets are about 1% or less these past few days which means I'd have to bet on 100 of these before I even break even which I don't see happening at all.

To sum it up, I'm neutral about this product. It does work just as it says, however, you may hit times where you get cancelled bets and that puts a very big dent in your profits, just like if you were a currency exchanger and you get hit with one chargeback basically. If OP can find another site as popular, this product would be a hit.

'popular softwares' are a lot more expensive than this service. One I know of asks for €129/month which is \$136, I only paid like \$65 for one month here. It's up to user preference, you could say the same about any product on HF, why not go somewhere else to buy it. Does that make sense?

I should add, without that last bet, I would have been up around 14mBTC, and if I won that bet without it being cancelled, id probably be at around 22-23mBTC at that stage. 7mBTC isn't realistic in a week with this service, it's just unfortunate that I happened to have my bet cancelled.

Exactly. Unlucky that your bet got cancelled.

Happy news!

I am happy to announce that our program has been remade and is online & running again :)

We have received a lot of positive feedback and we've noticed it had some problems so we fully

remade it. No longer including powerbet!

Our 'program' now works on Discord as a BOT and updates everyone when arbitrage matches are found. We are currently in BETA.

After a lot of requests we've decided to start selling again!

Our prices are really cheap as of right now!

Weekly subscription: \$29.95

Monthly subscription: \$64.95

When we are no longer in BETA our prices will be about 50% higher.

This is really good investment to put your money (Bitcoins) on.

Our Discord bot always messages when there is an opportunity available, you go to the provided sites, place bets, wait, profit.

We have runned this project for more than 4 months and we've got highly positive feedback. Around month ago we stopped to rework on our program and make it better & more optimized.

By the way, this isn't risk-free. ?Can't you read? Yes a lot of things have changed.

And yes this is risk-free. You are more than welcome to google the term "arbitrage betting". At least now its risk-free because we've done many changes. Added new sites & removed some.

Stop sale trashing :)

**RoyRogersMcFreely** - March 24, 2017, 3:28 pm

Arbitrage betting, or "sure-betting", is not worth it imo. You'll be risking big amounts of money for small "sure" wins. These wins aren't always sure though. Sometimes your bet might be cancelled and refunded leaving you with a very big loss that will take many, 20 or more usually, successful sure-bets to heal. Other times you might get banned from the bookie or your bets might get limited. Arbitrage betting is more riskier than just doing a bit of research and betting on value bets.

Also bookies may start limiting your bets or blocking your account if they find you to be betting this style.

I haven't done arb betting in awhile but wondering if OP has encountered any of these problems before

We have added & removed new sites that are 100% best for this.

No one has ever gotten limited or banned on any site from 100+ customers we've had. Only limitations that has happened has been on a site called powerbet which we have removed from our program.

Hope you understand.
