????? Qean's Battlefield 1 Contest ?????

I was going to sell this game in the Marketplace because I do not play Battlefeild, I usually play Call of Duty. But I recently found out that it is currently against the rules to sell Xbox products in the HF Marketplace so I'm giving this away for free. It's a 25-Character code for the digital download of Battlefield 1 for Xbox One. It came with my Xbox One 500 GB Bundle.

Battlefield 1 Digital Standard - Xbox One [Digital Download]

Picture Proof:

Product Details

- Developer: Microsoft/EA
- Publisher: Microsoft/EA
- Platform: Xbox One
- Genre: shooter
- Release Date: 10/13/2016
- Rating: Mature

To enter this contest simply post here, as always please keep it HQ. I will pick a winner in 3 hours using Random.org. I will plug in the number of all posts in this thread onto there and the post number it generates will be the winner.

Requirements:

- You must be a member of Hackforums for at least 1 week
- You must have an Xbox One

I just picked a random winner through Random.org. Here are the results:

[Prettykitty](#) is the winner! I will contact you shortly on how to claim your Battlefield 1 prize.

Thank you to all members for participating. My contest is now officially over and I'm closing this thread to prevent any misunderstanding. I will do more of these contests, so if you didn't win today there is still a chance for you to win in the future!
