You might as well sell them on stockx or grailed no one here will pay what you want, everyone including myself will low ball the shit out of you.

I was planning to. I'll get roughly \$530 after fees for them. Was just seeing if anyone was interested prior to me selling on there.

I don't ever see why people would lowball when I could just instantly get a higher offer from selling through those sites.

Most of the ebook sellers buy other ebooks and learn how to make around 10 figures a month
